

Santa Rosa Junior College

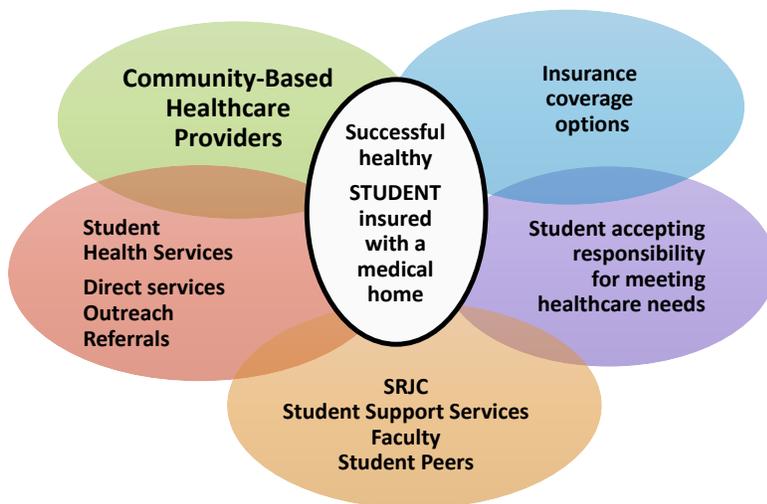

Program Resource Planning Process

Student Health Services 2023

1.1a Mission

The Student Health Services Vision is:

To have healthy, academically successful students, learning in a healthy college community, with access to health support resources.

The mission of Student Health Services is to maintain and improve the physical, mental, and social health of students through culturally-responsive care at Santa Rosa Junior College, and to strengthen and inspire the well-being of the diverse college community, towards supporting student success and life-long learning.

Values: Health, Learning, Academic Excellence, Sustainability, Diversity, Community, Beauty, Compassion, Innovation

1.1b Mission Alignment

SRJC passionately cultivates learning through the creative, intellectual, physical, social, emotional, aesthetic and ethical development of our diverse community.

The mission of Student Health Services is to maintain and improve the physical, mental, and social health of students through culturally-responsive care at Santa Rosa Junior College, and to strengthen and inspire the well-being of the diverse college community, towards supporting student success and life-long learning.

Student Health Services (SHS) is strongly aligned with the District's mission statement. Both describe a developmental model (improve, strengthen, learn, inspire, cultivate) and are multi-dimensional towards addressing the whole. A healthy community is articulated in both mission statements.

Our mission explicitly uses the terms "physical, social and mental" health, as this is the World Health Organization's definition of health. In aligning the two mission statements, this is a fairly simple translation. For example, mental health, used in our mission statement, includes intellectual and emotional health, as stated in the District statement; social health is related to ethical development, etc. When students have contact with SHS, they learn something about themselves (physical/mental/social) and how to improve their health. Improved health enhances their learning capacity, and contributes to their success in college and in life.

See section 3 for more information on SHS's work and alignment with Strategic Plan Goals

1.1c Description

Student Health Services is described via a Board of Trustees approved "Health Services Plan". Allowable scope of services, staffing minimum requirements for supervision, and appropriate use of Health Fee funds are regulated by both Education Code Section 76355 and Title 5.

[Board Policy 8.4P \(hyperlink\)](#)

The college community and individuals are served by a variety of activities to maintain and improve health. Through a combination of District hired staff, contracted professional services,

and collaboration with community agencies, services include Clinical Services, Mental Health Services, Health Promotion Services (individuals, classrooms, and college-wide events), and District Support Services (health and safety, risk management, policy advising and staff consultation services).

The Student Health Services programs and services provided are focused on student retention and success.

By providing free access to individualized healthcare services on two campuses, many health barriers to student success are addressed early and effectively. As demonstrated in SRJC's student access and success reports, students who access SHS's individual professional services in the health centers are retained at higher levels, and have higher completion rates than students who do not access SHS services.

The health promotion and outreach functions of the department provide health-related information to students in classrooms and on campus, and also educate students about the various health services available for them at the college. SHS has organized and sponsored many college events in collaboration with various academic and student service departments, in order to increase student engagement campus-based activities, provide educational forums and bring visibility to health related issues as connected to student success.

Student Health engages in a variety of risk management processes in support for the District. Leadership for the B:CARE team is provided, offering support to faculty in addressing distressed, disruptive and dangerous behaviors in students so they may get back on track with their academic performance and success. Environmental health issues, communicable disease control and disaster preparedness are other areas of SHS support provided.

1.1d Hours of Office Operation and Service by Location

Prevention and health promotion services, outreach events, staff consultations (CIRT and other), classroom presentations and other District support services are throughout the District Monday through Friday, with variable scheduling by professional staff, including evenings.

Student Health Services currently maintains two office locations. On the Santa Rosa Campus, clinical services are located in the Bertolini Building. On the Petaluma Campus, clinical, mental health, and health promotion services are all housed collectively in the Richard W. Call Building.

Hours of Operation:

SANTA ROSA CAMPUS

Bertolini Building Office Hours:

Mon - Friday. 8:30 AM – 5:00 PM
(Closed Fridays during June/July)

Services for Individual Students:

Nurse Practitioner

Monday through Friday

Physician	Tuesdays and Fridays
* <i>Redwood Community Health Coalition</i> (<i>Medi-Cal/ACA and Cal-Fresh enrollment</i>)	<i>remote</i>
Mental Health Counselors	Monday through Friday

PETALUMA CAMPUS

Richard W. Call Building Office Hours:

Wednesdays 9:00 AM to 5:00 PM

Services for individual students:

Nurse Practitioner	Wednesdays
Mental Health	Wednesdays
* <i>Petaluma Health Center</i>	Wednesdays (monthly)

(*FAM-PACT reproductive health services*)

* *Italicized services are provided by community agency partners at no-cost to the students or SRJC.*

1.2 Program/Unit Context and Environmental Scan

Describe any changes in the social, business, cultural, educational, technological or regulatory environment that could impact your program/unit over the next three years.

The COVID-19 Pandemic exacerbated a persistent trend in decreasing enrollment that dates back to the 2017 fires. This are still impacting services, programs and the economic dynamics of the local environment significantly.

There is a national trend of low enrollment in colleges of all shapes and sizes. One could argue that SRJC isn't a traditional 2 or 4 year college and that our vocational programs (nursing, public safety, etc) will provide enough of a draw to buffer us. Some also hold out hope that lifting our vaccine requirement will cause an uptick in enrollment but this has not been the case in other community colleges in California. It remains to be seen if Fall 2023 gets student health services the health fees (per student) that we need to balance our budget.

Black Lives Matter and DEI awareness brought about a focus on serving the underserved. Since 2020, Student Health has provided services to non-credit (mostly English language learners). This is not sustainable without a funding source. Also, especially with a Spanish speaking therapist, it has renewed our efforts to provide Spanish speaking front office staff. We often have a student health aide or two who are bilingual and the STNC medical assistants sometimes are bilingual. But this is a patchwork

solution that begs the need for a permanent bilingual support staff member. It is easier to hire medical assistants than nurses or nurse practitioners.

The end of the pandemic has given state and local funders the opportunity to focus on the next pandemic: mental health. The Chancellor's Office has greatly increased the mental health allocation and a local bond measure has given us the money to relieve some of the pressure on the health fee budget. Furthermore, our county outreach grant has been renewed. These 3 sources will provide support for the next 5 to ten years.

COVID-19 testing and vaccinating has been free from the state. The testing is likely to continue through November 2023 so we can continue to offer to students and staff until then. After that, we might be forced to buy the tests. My guess that at some point we will only be able to obtain free COVID-19 vaccines for students, not staff (as we do for influenza vaccines). This might occur as soon as Fall 2023.

The state of California has dropped the COVID-19 State of Emergency. Our Covid Team winding down with elimination of vaccine mandate but we are still left with the OSHA requirement to notify employees of COVID exposure. That regulation will not expire for several years unless it is lifted. There is a high chance of it being lifted by the end of 2023, especially once the virus is no longer a reportable disease, unless there is a resurgence of the pandemic. The money to pay for COVID related activities ends with the fiscal year 22-23 with nor more likely to come.

2.1a Budget Needs

Student Health Services went remote suddenly in 2020 due to the pandemic.

	<u>22-23</u>	<u>21-22</u>	<u>20-21</u>	<u>19-20</u>	<u>18-19</u>	<u>17-18</u>
4000	19,902	16,417	5,478	17,770	23,060	22,637
5000	65,362	58,694	48,339	33,418	26,207	44,283

Supplies (4000s): are down from pre-pandemic including medical supplies for students as part of the provision of health services. We are seeing fewer in person visits.

Contracts (5000s): Part of our 5000 expenditure is our electronic medical records. We have added many modules due to pandemic (vaccine reporting) and remote work (patient portal). The other 5000s are primarily mandatory physician contracts which remain stable.

We will be able to cover 4000 and 5000 budget needs.

2.1b Budget Requests

Rank	Location	SP	M	Amount	Brief Rationale
------	----------	----	---	--------	-----------------

2.2a Current Classified Positions

Position	Hr/Wk	Mo/Yr	Job Duties
Health Promotion Specialist	40.00	12.00	Coordinate PEI Grant activities, classroom presentations, community liaison work, suicide prevention trainings, BCARE member, health awareness and outreach activities. Plan, implement and evaluate health promotion programs. Certified trainer for many MH curriculums.
College Nurse Practitioner(2 positions)	60.00	12.00	Direct individual services for acute illnesses and injuries, immunizations, screenings, referrals, and health education. Public health consultations and prevention services for the college community. Administrative support tasks, as assigned.
Medical Assistant (2 positions)	100.00	12.00	Under general supervision, perform administrative, clinical and technical support services for Student Health Services department; provide a variety of direct and indirect health-related services.
Therapist/Outreach -Spanish speaking	40.00	12.00	Provides individual mental health therapy to students. Performs district wide mental health outreach.
Health Services Assistant	40.00	12.00	Under general supervision perform support services for Student Health Services, requiring related technical skills and expertise; perform administrative duties requiring initiative, independence, and confidentiality in one or more of the areas of office management, fiscal management, customer relations or other specialized services, including risk management; develop and maintain online and print information.

2.2b Current Management/Confidential Positions

Position	Hr/Wk	Mo/Yr	Job Duties
Director, Student Health Services	40.00	12.00	Administrative oversight of SHS budgets and programs, personnel supervision, BCARE and MAA Coordinator, college-community-state liaison, disaster planning, District policy and procedure development, contract supervision and clinical and program quality assurance. District communicable disease control.
Manager, SHS-Mental Health Programs	40.00	12.00	Administer mental health programs, mental health grants oversight, supervise mental health internship site, SPS and PEI (Prevention and Early Intervention-MHSA) personnel supervision, CIRT, college-community-state liaison, District policy and procedure development, program quality improvement.

2.2c Current STNC/Student Worker Positions

Position	Hr/Wk	Mo/Yr	Job Duties
PEI FUNDED Student Health Aide pool	72.00	10.00	Peer student mental health support activities; health promotion
HSI FUNDED PE Licensed MH Provider pool	11.00	10.00	Provide individual and group supervision for mental health interns, training, direct services.
HSI FUNDED STNC Mental Health Interns pool	120.00	10.00	Provide direct mental health services, (crisis intervention, individual, couples, group therapy), presentations on mental health topics.
Health Fee FUNDED CNP STNC backfill pool -assorted	24.00	11.00	CNP duties - backfill hours for CNP Sick, Vacation, Jury Duty, etc. Also COVID vaccinations.
Health Fee FUNDED Student Health Aide pool	100.00	12.00	Reception and intake for 2 facilities, support administrative and outreach functions.
ATHLETICS FUNDED CNP STNC pool - project	6.25	4.00	Direct individual services to support Athletic screenings and exams, providing medical clearance for SRJC athletes to participate in sports competitions. Episodic work..
Health Fee FUNDED medical assistants	50.00	12.00	Under general supervision, perform administrative, clinical and technical support services for Student Health Services department. Backfill for NP maternity leave.
Health Fee funded Health Services Assistants	25.00	12.00	Reception and Intake- backfill hours for PTO
Administrative Assistant II	20.00	6.00	Reception and Intake- backfill hours for PTO

2.2d Adequacy and Effectiveness of Staffing

Student Health Services, for the most part, has adequate staffing to effectively serve the needs of the students at this time. The deficit is primarily in a permanent staff member who speaks Spanish. That will be remedied in the next hiring cycle since a front office medical assistant is retiring. If enrollment increased in the Fall of 2023, we will need a back office medical assistant to increase the productivity of the nurse practitioners. That person could also be Spanish speaking.

Our outreach specialist is partially working out of class as a Student Services ombudsperson. We are currently hiring another outreach specialist to assist her.

2.2e Classified, STNC, Management Staffing Requests

Rank	Location	SP	M	Current Title	Proposed Title	Type

2.4b Rationale for Instructional and Non-Instructional Equipment, Technology, and Software

STUDENT HEALTH SERVICES TECHNOLOGY AND SOFTWARE NEEDS

Current Environment:

In addition to standard network connections to the College's Outlook, Escape and Student Information (SIS) systems, the Student Health Services department **utilizes a software system (Medicat) specific for healthcare information processing.** Permanent employees, contractors, student workers and psychology interns utilize the system for management of student appointments, to document student services rendered, tracking for clinical case management purposes, engage in continuous clinical quality improvement activities, and to access internal reporting, analysis and program evaluation functions. The software system interfaces with the College's student database, via a regular schedule of uploads from SIS, when demographic student information populates selected fields in Medicat. Up to 45 separate users shared the department's 34 desktop computers and 6 laptops, located in three different facilities on two campuses, and used during outreach events. The current District policy is to replace hardware every 7 years.

The Medicat system was moved from a dedicated server on site in SRJC's IT department, to a web - based remote server system provided by our software contractor, in 2016. This improved network security as the company provides the highest level of HIPAA certified security. This also was a cost savings for IT, but increased the cost of the system, which was then transferred to the Student Health Services budget. Additional software functions were added as part of the migration, including confidential communication between students and providers, self-check-in capacity in the health centers, online student health with appointment access 24 hours/ 7 days a week, and more. All of these technology functions are compatible with reducing workforce labor in SHS as part of "right sizing", as well as achieving the highest standards of confidentiality from both a technical, and operational perspective. These functions are slowly being phased in to the workflow, as facilities, hardware support and database management by SHS staff allows. Modules have been added to modernize lab and medication ordering, also reducing the chances of medical errors. Modules have been added for use during the pandemic to facilitate vaccine and covid test results to the state.

SHS Technology Goals

Evaluate and adjust appropriately technology solutions in the health centers on the Petaluma and Santa Rosa campuses to best support providers/staff, students and the clinical practice towards:

- a) Quality improvement in the clinical practice.
- b) Achieving the highest standard of medical confidentiality for students.
- c) Secured confidential communications between providers and students to support case management follow up.
- d) Increase health support services for on-line students.
- e) Ergonomic integrity for all.
- f) Most effective and efficient charting/documentation methods.
- g) Optimum communicable disease control (early alerts).
- h) Optimum technology support for student learning in the SHS department.
- i) Other enhancements as new technologies emerge to meet healthcare and educational industry standards.

Budget/Financial Strategies

- ITG Bond Fund Revenue: District/Bond support is critical. Whereas the facility is priority, any needed tech/hardware items will be requested via this route.
- Instructional/Non-Instructional Equipment Funding as appropriate
- Health Fee revenue – Resources as available
- External and grant funding as available for projects upgrading our technology capacities.

STUDENT HEALTH SERVICES OTHER EQUIPMENT NEEDS

With a significant portion of the department's function being healthcare services delivery, there are a number of equipment needs required for the practice. The department has purchased and maintains equipment such as audiometers, vision screening machines, blood pressure monitoring equipment, otoscopes, microscopes and more.

STUDENT HEALTH SERVICES FURNITURE NEEDS

Mostly met by the purchases associated with moving from Race to Bertolini.

2.4c Instructional Equipment Requests

Rank	Location	SP	M	Item Description	Qty	Cost Each	Total Cost	Requestor	Room/Space	Contact
------	----------	----	---	------------------	-----	-----------	------------	-----------	------------	---------

2.4d Non-Instructional Equipment and Technology Requests

------	----------	----	---	------------------	-----	-----------	------------	-----------	------------	---------

2.4f Instructional/Non-Instructional Software Requests

Rank	Location	SP	M	Item Description	Qty	Cost Each	Total Cost	Requestor	Room/Space	Contact
0001	ALL	01	02	Medicat EMR	0	\$750.00	\$750.00	Rebecca Norwick	SHS Santa Rosa and Petaluma	Brian Chetcuti

2.5a Minor Facilities Requests

Rank	Location	SP	M	Time Frame	Building	Room Number	Est. Cost	Description
0001	Santa Rosa	02	02	1 Year	Bertolini	exam rooms and director's office	\$0.00	new, light blocking blinds needed for patient care, director's blinds are ripped.
0001	Santa Rosa	02	03	Urgent	Bertolini	therapy rooms	\$0.00	sound proofing

2.5b Analysis of Existing Facilities

IMPROVE FACILITIES AND TECHNOLOGY - Provide, enhance, integrate, and continuously improve facilities and technology to support learning and innovation.

Santa Rosa: Student Health Services finally moved into one facility on the Santa Rosa Campus that houses the clinical (SHS), mental health (SPS), health promotion and administrative support functions in our department, to improve effectiveness, efficiency and an integrated health support student service experience. Our move to Bertolini succeeded in bringing SHS and SPS together but without Health Promotion.

Our space is inadequate to house the measure O positions (2 full time therapists) and Health Promotions is housed elsewhere in an inadequate space.

Petaluma: This facility meets the utilization and safety needs for SHS operations adequately, and all of the space is not fully utilized at all times. The design of the front reception area, with a window and locked door between the public and staff supports lower staffing levels for safety.

3.1 Academic Quality

List anything that your program/unit has done to support Strategy 1: Academic Quality:

Goal 2: Inspire and prepare students for transfer, degree or certificate completion, and lifelong learning through critical thinking and civic engagement.

Promote robust professional development and maintain professional development resources on culturally responsive andragogy and practices that are annually reviewed and updated.

Student Health Services utilizes student health aides and we have a mandate to support them. While the student empowerment academy fell by the wayside during the pandemic, we continue to encourage them to better themselves through department and District trainings.

Furthermore, we have many years of data showing the students who utilize Student Health Services resources have a statistically significant improvement in retention and completion.

3.2 Student Success and Support

3.2 STRATEGY 2: STUDENT SUCCESS AND SUPPORT

In this section, list anything that your program/unit has done to support Strategy 2: Student Success and Support:

Goal 1: Build a culture and ecosystem that creates a sense of belonging and purpose for all students.

- Prioritize student services events and activities which sustain a community committed to student learning and development

Goal 2: Leverage basic needs services in support of student success while at the college and in the community.

Provide all students with comprehensive learning opportunities on accessing basic needs in support of wellness

Events include mental health preventive outreach such as "reducing test anxiety" and "mindfulness." We also have events for health science students such as vaccination clinics in the building where the classes are held.

SHS excels at meeting lifelong educational needs of communities, as it pertains to improving physical, mental and social health, and developing knowledge and skills in navigating the healthcare system. Examples:

- Work is being done with at-risk students without health insurance. This is a predictor of poor academic retention, traumatic financial distress with unplanned health events, and is associated with health conditions worsening without treatment, such as depression and anxiety. A major educational initiative on the Affordable Care Act was launched by SHS during 13-14 when the federal mandate began, and has continued to develop. Students, staff, adjunct faculty and community members have accessed enrollment counseling services provided in the health centers. Educational outreach is done. The information and skills shared with this work contributes to the lifelong skills of learning how to navigate the rather complicated healthcare system in this country.
- Working with students around their health related behavioral choices contribute to lifelong learning, including communication and relationship skills, substance use, contraception, nutrition, exercise, and recognizing signs of acute and chronic health conditions needing intervention.

SHS provides substantial student employment opportunities, with up to 16 student employees working in the department at times. Our student workers (Student Health Aides and Student Health Aide Peer Support workers) are typically pursuing some aspect of the health care field as their educational goal. These employees are provided with structured trainings, including core workplace skills, professionalism, and health education, as well as focused work experience. SHS also has a mental health internship program (Masters, Doctorate and Post-Doctorate students from graduate programs throughout the Bay Area) on site, training psychologists.

Cultural Competency:

SHS provides services for individual students in Spanish, provides staff development opportunities for employees on multi-cultural issues, and has in-house quality improvement review systems that include culturally sensitive interventions as a criteria.

- SHS actively recruits diverse staff with demonstrated skills in multicultural responsiveness. With the awareness that front desk staff literally are the “face” of SHS, we seek to hire Student Health Aides that represent a broad range of diversity. Mental health interns, selected annually, also are considered in terms of their ability to contribute to the diversity of SHS’s staff. The ability to hire bilingual-Spanish licensed/certified healthcare workers is increasingly challenging, as the broader healthcare community is expanding rapidly due to the demand for services with the coverage expansions under the Affordable Care Act, and every health care agency is targeting bilingual-Spanish workers, making it very competitive in an environment when there clearly are not enough bilingual licensed health care workers to begin with. It is a crisis within the local healthcare community.

3.3 Responsiveness to Our Community

3.3 STRATEGY 3: RESPONSIVENESS TO OUR COMMUNITY

In this section, list anything that your program/unit has done to support Strategy 3: Responsiveness to our community

Goal 1: Offer SRJC programming that impacts all members of our community.

- SRJC programs regularly assess their purpose in relation to diverse needs in education, community, and economics.

Goal 2: Provide equitable access to District opportunities in recognition of diversification in county population.

All new and updated policies, procedures, and practices will be reviewed to ensure equitable access to District opportunities (i.e., programs, enrollment, and employment).

1. The pandemic has brought an increased awareness of the importance of our essential workers programs (health sciences, public safety, dental, etc). Student Health Services has a special mandate to work with these groups on immunizations and tuberculosis screening. We vaccinated our health science students early in the pandemic when no one else was willing to. We work to provide access for tuberculosis screenings and refer uninsured students to the Jewish Community Free Clinic for the expensive quantiferon blood test when necessary.

We receive athletic fees to support our student athletes. We have a robust pre-sports screening program that encompasses not only physical but mental health issues. We have a mental health trainee specializing in sports psychology embedded in the athletic department. We coordinate case management of athletes of concern with the athletic trainers. This is unusual in a community college. Students come to SRJC because of our athletics programs and Student Health Services is an integral part of that.

2. Our bilingual services (physical and mental health) improve access for students of diverse backgrounds and support the District claims to being a Hispanic Serving Institution. During the pandemic, we expanded services to non-credit students who do not pay a health fee. Very few non-credit students have utilized this opportunity but, to continue, we will need a regular

funding source for this. Board policy says health services are for credit students and the state and federal states of emergency have been lifted.

3.4 Campus Climate and Culture

3.4 STRATEGY 4: CAMPUS CLIMATE AND CULTURE

In this section, list anything that your program/unit has done to support Strategy 4: Campus Climate and Culture:

Goal 1: Formalize a campus climate that is culturally aware and prioritizes efforts in support of inclusion, diversity, equity, antiracism, and accessibility (IDEAA).

- Establish and regularly assess an identifiable campus climate and culture for everyone who interacts with SRJC.

Goal 2: Promote a community culture of sustainability.

Identify annual goals for sustainability, including the creation and regular assessment of a District Sustainability Plan that achieves the Presidential Climate Commitment.

1. See 3.1-3.3

2. Student Health Services has become much less paper dependant since the pandemic. For example, the big athletic screening paper packet is now on-line in our electronic medical records. Furthermore, we have been filling up our compost bucket at such a rate that we ordered a larger one.

4.1a Course Student Learning Outcomes Assessment

4.1b Program Student Learning Outcomes Assessment

SALO 22-23 was to complete the Health Minds Study of our students in conjunction with other community colleges. We acheived that goal.

4.1c Student Learning Outcomes Reporting

4.2b Narrative (Optional)

SHS has done a regular cycle of assessment of its Student Learning Outcome statements for many years, resulting in program changes derived from analysis, dialogue and prioritized quality improvement initiatives.

Spring 2022 saw the completion of the HEALTH MINDS, in conjunction with many other community colleges from the Health Services Administration, California Community Colleges. This significant undertaking provides a rich collection of data on the health challenges of SRJC students.

Our SALO for 23-24 is to analyze the data and make recommendations for program changes.

5.0 Performance Measures

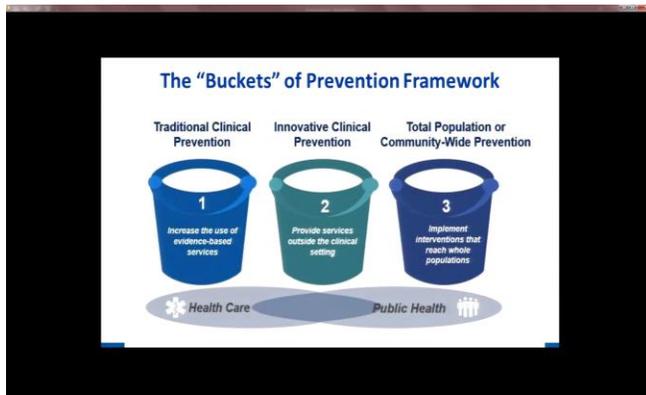

SECTION 5: PERFORMANCE MEASURES

5.0 Program/Unit Workload and Performance Measures

This section allows programs/units to define and report on their own unique workload and performance measures. The program/unit should identify any unique **non-academic** data elements that provide insight into the quantity and quality of the services you provide. Trend data is particularly helpful.

STUDENT HEALTH SERVICES PERFORMANCE MEASURES

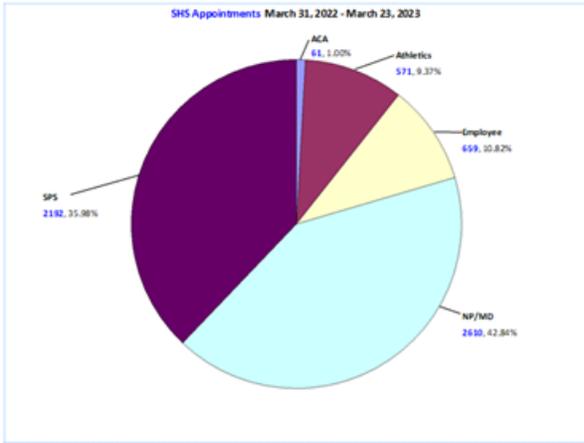

From the perspective of a public health model, population based prevention interventions have a positive health impact on more students, with much less cost. These include health related social norms marketing campaigns (substance use), skills training (navigating the health system, asking for help), policy work (sexual assault prevention) and communicable disease control efforts. One on one professional visits for physical or mental health will perhaps have a greater impact on an individual student, yet is a much more expensive activity, and often involves treatment for conditions that could have been prevented. This service is critical to maintain, though, at some level, as this is the safety net for many students, where serious and high risk conditions otherwise would go unrecognized and/or treated. Resources spent this way, though, on a small percentage of students, needs to be adequately balanced with health programs that impact the community's population overall.

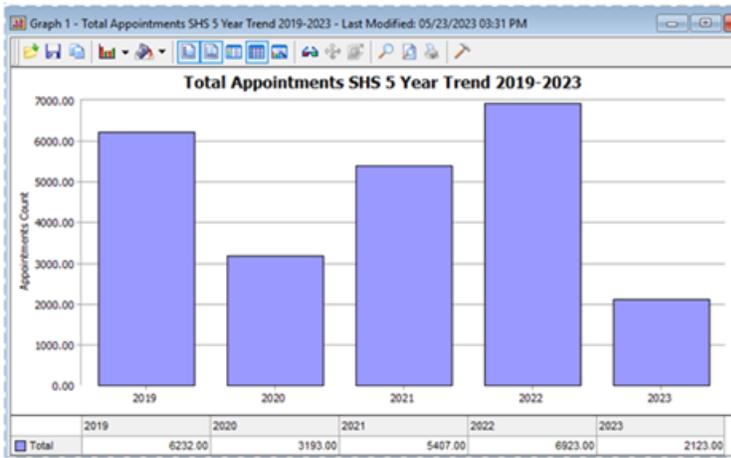

Clinical Prevention – Integrated Service Model as best practice

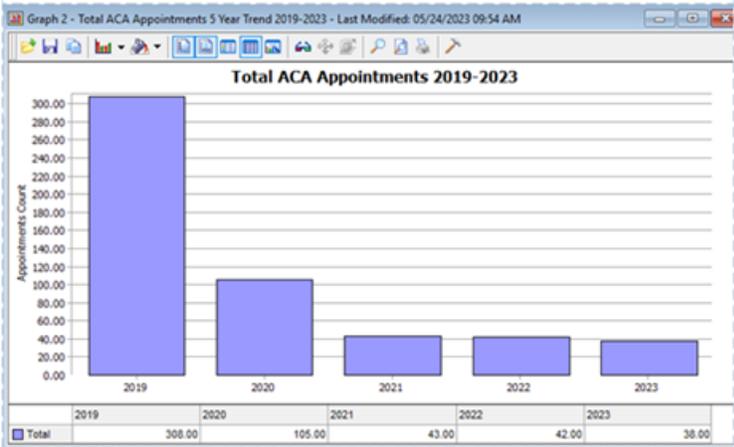

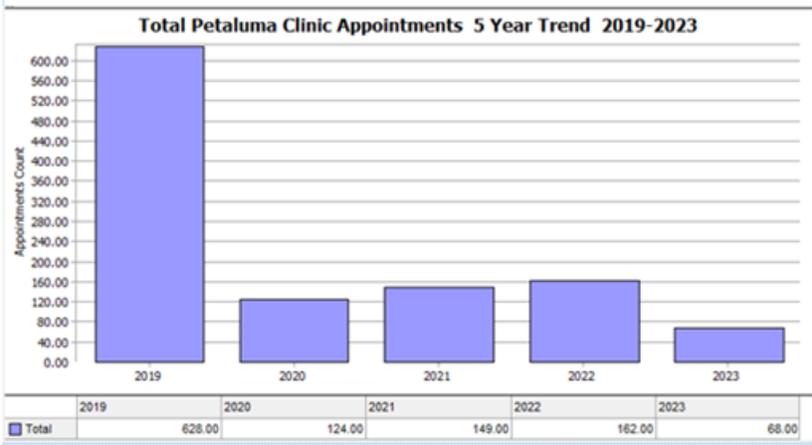

SHS has implemented an integrated, student centered model of services that with nurse practitioners and mental health providers working closely together.

SPS is providing a high percentage of visits than the NPs.

The following graphs are by calendar year, not semester. Which is why the 2023 numbers are so small.

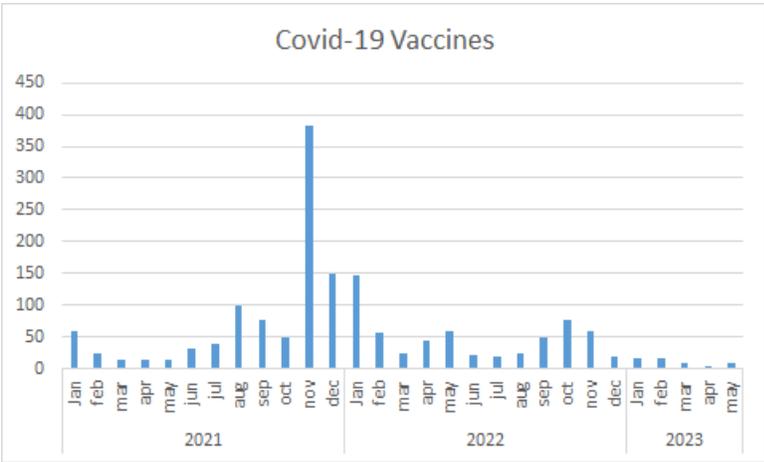

Our COVID Team has been winding down operations.

Reported covid cases by academic year. Not all these individuals accessed a district site while contagious but they all reported testing positive and had contact tracing calls.

21/22 Academic Year	(8/22/21-5/30/22)	669
22/23 Academic Year	(6/1/22-5/19/23)	649
	Total	1318

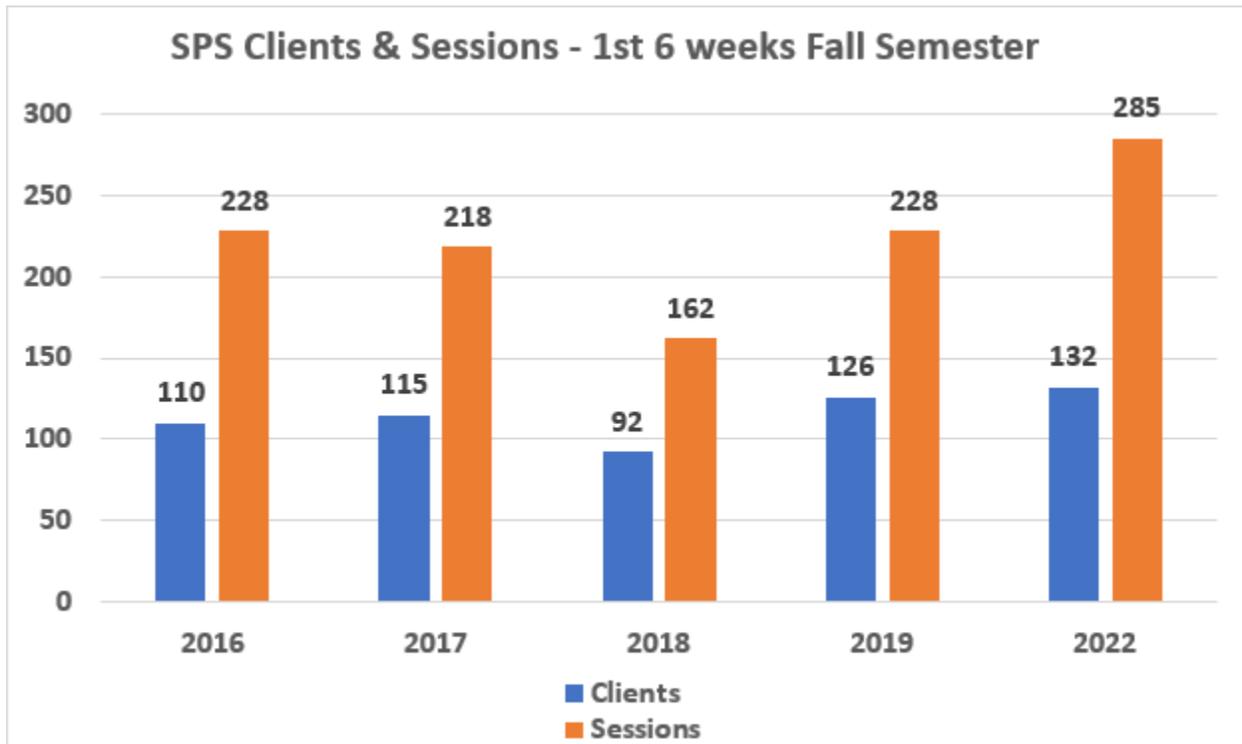

add prepmo data?????

tests ??????

Vaccines validated through Clear4 = 23,202 unique students, employees = 2,125 (Oct '21-Feb '23)

Student Psychological Services wait list:

Data, purposely leaving out 2020 and 2021 given their abnormally low numbers with our exclusive remote service:

The first takeaway is what a fantastic job our therapists, supervisors, and front desk staff have done given the large number of students and student appointments. Everyone is working really hard to help our students. And, so many have benefited.

Included in the above numbers are DRD assessments. Looking back on previous years, we averaged 10 through six weeks. This year we did 20 (plus have another 10 on our wait list.) We now have nurse practitioners performing DRD assessments.

It is also interesting to think if we subtracted 10 from each of our columns in 2022 (to account for the extra DRDs), then our number of students seen would actually be less than in 2019, and not too much more than in 2016/2017.. Where our numbers are particularly high are in sessions provided. Back around 2016 we put a huge emphasis throughout SHS on referrals, and in the last two pandemic years, when our number of students seen was drastically lower we moved away from this because we were able to see students much longer and refer less. This year we carried on with somewhat similar patterns, not knowing the demand. But, many of our current clients started with us around the beginning of the year, and our therapists are getting ready to complete work with most of them. In our “second round” of students we will have a different mindset that I believe will allow us to move students through more quickly or refer before they come or immediately, greatly reducing wait times, wait lists, and numbers of drop ins.

6.1 Progress and Accomplishments Since Last Program/Unit Review

Rank	Location	SP	M	Goal	Objective	Time Frame	Progress to Date
0000	ALL	00	00				
0000	ALL	08	02	Pandemic Modifications	22-23 saw a continuation of the COVID-19 Teams efforts in vaccine validation, vaccine exemption approval, case tracing, employee notification of covid-19 exposure, testing, and vaccination. The mask mandate was lifted June 2022. Spring of 2023 saw the end of the state and federal state of emergency which relieved some reporting requirements for COVID-19.	Ongoing	Administrative and staff time Administrative support time and labor

Rank	Location	SP	M	Goal	Objective	Time Frame	Progress to Date
0001	ALL	02	02	SHS Funding Stabilization	Measure O passed but the contract with the county was not signed until Fall 2022 and the money didn't start coming in until Spring 2023. But it did come and the health fee budget balanced for the first time in more than 5 years. This was assisted by the Chancellor's Office Mental Health Allocation. Health fee intake was stable with a small increase in enrollment. Health Fees increased but at a slower rate than allowed by the Chancellor's office. This required approval by the Board of Trustees. Athletic Fee was increased.	Ongoing with Quarterly Reviews	<p>Administrator and Staff time</p> <p>Administrative support time to assure all fiscal tracking systems are in place and operational for fiscal accountability and analysis. Rank	Location	SP	M	Goal	Objective	Time Frame	Resources Required
0000	ALL	00	00				
0000	ALL	03	02	Pandemic Modifications	The State of Emergency has been lifted and SRJC no longer has mask or vaccine mandates. The only remaining pandemic activity is the OSHA requirement to notify employees of exposure to COVID-19. This means that case tracking, website updating, union notifications, and student portal announcements will continue.	until 2025	Administrative and staff time Administrative support time and labor. All of the HEERF funding has been used up so this comes out of Health Fee. The most of the COVID-19 Team has been laid off except for medical assistants who will now do office work as well as covid work.
0001	ALL	02	02	SHS Funding Stabilization	Measure O has taken large amounts of mental health staff salary off the health fee, resulting in the first balanced budget in more than 5 years. This will likely remain for at least 5 years, maybe longer if enrollment improves. Also, we now bill Medi-Cal for reproductive health services, this may generate as much as \$1 per enrolled student. Effectively paying for our electronic medical records.	1 year	A contract has been signed with Medical Billing Technology to assist with billing efficiencies. They will take a cut of what they bring in. The MAs will be trained in FPACT enrollment so they can support the NPs, allowing FPACT to be rolled out to more providers.
