

# Santa Rosa Junior College

## Program Resource Planning Process

### Pharmacy Technician 2014

#### 1.1a Mission

##### **Program Mission**

Based on the major missions of the college, the faculty of the Pharmacy Technology Program at Santa Rosa Junior College is dedicated to facilitating the growth and development of enrolled students in becoming competent entry-level pharmacy technicians to function within the healthcare community they serve.

#### 1.1b Mission Alignment

*NOTE: The Sonoma County Junior College Mission Statement and [Strategic Plan Goals and Objectives](http://www.santarosa.edu/planning) can be found at: [www.santarosa.edu/planning](http://www.santarosa.edu/planning).*

The Pharmacy Technician Program aligns with the Sonoma County Junior College District's Mission affirmations:

- \*The 25 units of the Pharmacy Technology coursework supports lower division academic education toward the AA/AS degree and transfer to a four-year institution.
- \* The Pharmacy Technology program provides a career and technical education which supports the economic development and job growth.
- \* The Pharmacy Technology program enjoys multi-dimensional collaborative partnerships that promote and maintain student success and retention.

Developed from an identified community need, SRJC's Pharmacy Technician Program maintains high standard of health-care education. Accomplished and committed instructors' work as a team to prepare students for retail and commercial job environments through an outstanding, multi-tiered health-care education. When students have mastered SRJC's rigorous curriculum, they are well prepared for a meaningful career as a Pharmacy Technician.

The Pharmacy Technician Program is available as a Career Certificate and as an Associate in major. The Program prepares students to be registered Pharmacy Technicians and for employment in a variety of pharmacy settings.

#### **[Accomplishments the Pharmacy Technology Program:](#)**

Accomplished \* Weekend College beginning Fall 2013 ~ In collaboration with pharmacy technology faculty, courses will be offered Friday and Saturdays.

Accomplished \* Courses designed in blended, 'flipped' and contextual learning, peer instructional environments with web enhancements.

Accomplished \* Execute curriculum process to grow the existing Pharmacology 155 to an online delivery with five meetings face-to-face a hybrid course for Spring 2014.

Fulfilled transitioned to the Community Education offerings! \* Execute curriculum process to develop a new training course *"Advanced Chemotherapy and Hazardous Medications Aseptic Technique"* ~ *Pharmacy 158.*

### **Under development:**

\* Offering Pharmacy 151 and Pharmacy 152 at the Petaluma Campus on a Tuesday or Thursday from 4 pm to 9 am in the FALL 2014.

\* Changes in the City College of San Francisco environment in their Pharmacy Technician program, written within this PRPP, for consideration, is to offer a full Pharmacy Technology Certificate Program at our sister campus, Petaluma, by Fall 2015 or earlier, as a weekend college. Contained in the Pharmacy Technology program are over 80 clinical sites within the region. The Santa Rosa campus program would serve students north. The Petaluma campus would serve students south, reaching into Vallejo, Vacaville, Marin, and San Francisco. Pharmacy Technology faculty buy-in, support and are on board.

\* Continued recruitment of High School and International students to the program

\* Continued recruitment of encore career individuals

\* Engagement of allocation of resources for fully functional Pharmacy Training Center and adjacent Large Lecture Smart Classroom

## 1.1c Description

### **Pharmacy Technology Website**

<http://online.santarosa.edu/presentation/page/?28999>

Pharm Tech Orientation Presentation

<http://www2.santarosa.edu/f/?nCxGRUBM>

- The Pharmacy Technician Program is a three-semester program with an A.A/A.S. Degree granted after the successful completion of the general education requirements.
- The Pharmacy Technician Career Certificate prepares students to be registered pharmacy technicians and for employment in a variety of pharmacy settings.
- Upon successful completion of the program, students will be awarded the Pharmacy Technician certificate and are qualified to apply to the California State Board of Pharmacy for registration as a pharmacy technician.
- Registration is a legal requirement for employment. Graduates of the certificate program are also encouraged to sit for the National Pharmacy Technician Certification Exam.
- While not currently a state requirement for employment, many employers provide increased compensation to pharmacy technicians once they become nationally certified.
- Pharmacy Technicians work under the supervision of licensed pharmacists to perform technical duties in the systematic operation of the pharmacy by providing health-care services and medications to patients.
- Technicians may perform many of the same or similar operational and technical duties as pharmacists; however, a pharmacist must check all of a technician's work before medicine can be dispensed to a patient.
- In addition, any issue involving professional judgment must be referred to the pharmacist. Duties may include, but are not limited to:
  1. Compounding (measuring, weighing, and mixing) medicinal drugs
  2. Preparing and labeling medicines
  3. Filling bottles and capsules with the correct quantity of medicine
  4. Issuing medicines to customers
  5. Stocking and taking inventory of prescription and over the counter medications
  6. Maintaining patients' medication profiles on computerized or written records or forms
  7. Filling orders for unit doses and prepackaged pharmaceuticals
  8. Preparing insurance claim forms
- Depending on the position, the technician may also manage third party billing, answer telephones, direct customers to items or to the pharmacist for medication consultation, receive written prescriptions, clean and sterilize dispensing bottles and instruments, answer questions regarding location of non-drug products, and operate a cash register.
- In California, specially trained senior technicians working in hospitals can check the work of other technicians. Protocols written by the pharmacist in charge in the hospital must be strictly followed.

- Pharmacy Technicians interact daily with co-workers, patients, and health-care professionals, good communication and interpersonal skills are essential.

The integration of the clinical and didactic education takes place in a sequential manner throughout the entire program.

- **First semester** pre-requisite course Pharmacy 150 Online.
- **Second semester** Fall program, the student will receive didactic instruction that includes:
  - Necessary knowledge in pharmacy law and regulations, drugs, dose and delivery systems, basic pharmaceutical calculation skills, introduction to the Pharmacy field, medical terminology, basic patient communication and confidentiality, dispensing procedures in a outpatient and inpatient facility, fundamentals of infection control and hazardous materials protection.
- **Fall semester** students are assigned a total of 60 hours of clinical work experience during which time they will be authorized to observe and assist a pharmacist or pharmacy technician in performing their duties or to assist in the other aspects of the facility.
- There is a responsibility and preceptor evaluation that is part of the course Pharmacy 154A Clinical Retail.
- **Spring semester**, students are assigned to clinical affiliates to complete 120 hours clinical work experience in accordance to the didactic instruction. This is in addition to the spring coursework.
- During this semester, and throughout the rest of their training, they may, under the direct supervision of a qualified pharmacist or pharmacy technician learn all other aspects of the practice of pharmacy in the retail, inpatient and specialty arena, as their didactic and clinical progress allows.
- As the program progresses, the clinical education load increases with the average of 120 to 176 clinical hours in the Spring semester.

Students will rotate through a minor affiliate/satellite in addition to the clinical experience at clinical education centers. The clinical coordinator will assign these rotations. They are directly connected and related to the didactic instruction that includes the dispensing skills, pharmacy operational principles and standards, communication and special procedures. Printed objectives, activities, evaluation criteria, and handbooks will be available to each student, clinical preceptor, and staff member. The clinical coordinator will supervise students' activities in the hospital, retail and specialty sites with the assistance of the clinical instructors.

In general, all activities related to the program will be conducted during the daytime - Monday through Sunday for clinical experience and classes as appearing on the Schedule of Classes. Exceptions do apply.

### 1.1d Hours of Office Operation and Service by Location

The Pharmacy Technology Program courses are offered on the Santa Rosa Campus, as a weekend college CTE program, on Fridays and Saturdays.

### 1.2 Program/Unit Context and Environmental Scan

#### **Environment:**

- The SRJC Pharmacy Technology Program is one of the SRJC's Career and Technical Education (CTE) training that has been traditionally called occupational or vocational education.
- Retention and course completion are well above the College average. The Pharmacy Technology Program awards the second highest number of certificates in the Health Sciences Department.
- Servicing 5 Regions; Sonoma, Marin, Solano, Lake and Mendocino counties.
- Experiential Clinical Work Site Employer Organization Rotations available in each county.
- There have been significant changes in the Pharmacy field regarding standards of eminence. National Certification was established in 1995 and has grown from around 60,000 in 1998 to over 122,000 (over half the workforce) in 2002. (California Endowment, funds the California Workforce Initiative <http://www.oshpd.ca.gov/HWDD/HWC/RP-PharmTechn.pdf>)
- The program has partnered with:  
*Barbara Gammon Brock, BS, MPA*  
Deputy Sector Navigator  
Interior Bay Area Region, Health Sector  
Doing What MATTERS for Jobs and the Economy, California Community Colleges

Cell: (707) 815-5733, Voicemail Only: (707) 864-7000 X5753

[Barbara.Brock@solano.edu](mailto:Barbara.Brock@solano.edu)

#### **Pharmacy Technology Methodological Strategy:**

1. Student centered integration of CSKLS 100/Pharm 100 as contextual learning
  - Math Across the Curriculum
    - <http://online.santarosa.edu/presentation/?10705>
2. Student centered scheduling on multi-campus, one college, inclusiveness of the Petaluma Campus
  - Santa Rosa Friday/Saturday program courses
3. Student centered Digital Technology

Pharmacy 155 and Pharmacy 157 IV Inpatient Training moved to online-hybrid beginning Summer 2013

4. Pharmacy Training Center

5. Job Opportunities and Marketing with three listservs:  
Pharm-Tech  
RN  
Counselors

### **Outreach Project:**

Participated with Schools Relations & Outreach, Michelle Booher-Poggi  
707.521.7854

Most recently, the Small Schools Event, on Friday, February 7, 2014. The Schools Relations and Outreach is hosted a group of high school Seniors and their Counselors/Teachers from a number of the District's small high schools promoting medical careers and programs. The outreach plans for 210 students and 45 adults.

In January 2014 the Pharmacy Technology Program participated in the Santa Rosa Plaza Outreach Event. Karla Turcios, Pharmacy Technician candidate June 2014, volunteered working four days, (1/5-1/8) with Admission and Records. We were very happy that she did. She is a very pleasant and professional young woman and she is definitely a great representative for the college.

In the Fall 2013 issue of Making Tracks to SRJC, SRJC Welcomes High School Concurrent Enrollment Students for Spring 2014. The Pharmacy Technology Program implemented a streamlined, easy process for high school students to participate in the program. They may take a course or courses concurrently and have a Pharmacy Technician Certificate and career by the time they are 18 years of age.

[http://www.santarosa.edu/for\\_students/schools-relations/making-tracks-to-SRJC/pdf/Fall\\_2013.pdf](http://www.santarosa.edu/for_students/schools-relations/making-tracks-to-SRJC/pdf/Fall_2013.pdf)

The Santa Rosa Junior College Pharmacy Technology Program Advisory Board comprises multi-dimensional talent from all business, institutional, and political sectors.

Our program contributed to the Contextual Learning Project for Pharmacy 153 Dosage Calculations and Pharmacy 101 Ethics. We teamed with Audrey White, Math Department and Ann Foster, English Department to achieve our goals within a flipped classroom, interactive participation, and peer instruction environment. This more closely aligned with the employment environment and the development of the much requested 'soft skills'.

The Counseling Department is dynamically informed. The Pharmacy Technology Program is hosting an Informational Session, Saturday, April 12th from 10 am to 11 am in Race 4044. This was also sent to High School counselors.

SRJC Pharmacy Technician website:

<http://online.santarosa.edu/presentation/page/?28999>

On January 30th, 2014 School performance reporting from the Pharmacy Technician Certification Board (PTCB) was reported on the Pharmacy Technician Certification Exam (PTCE). Summary Results for Santa Rosa Junior College, Santa Rosa CA:

SRJC Pharm Tech Percentage of Candidates Passed: 100%

National Average: 73%

SRJC Percentage of Candidates Failed: 0%

National Average: 27%

- The educational focus for the examination is knowledge regarding assisting pharmacists in serving patients, ethics, pharmaceutical calculations, pharmacology, IV inpatient and retail employment environments, maintaining inventory control systems and pharmacy administration and management.
- Certified pharmacy technicians may use the suffix "CPhT" behind their name.
- There are several governing bodies that administer the National Pharmacy Technology Certification Examinations: The Pharmacy Technician Certification Board (PTCB) and the Institute for the Certification of Pharmacy Technicians (ICPT).
- Certification through such programs standardizes the industry and enhances prospects for employment as well as being required by some States and employers.
- Pharmacy technicians must be recertified every 2 years. Recertification requires 20 hours of continuing education (including 1 hour of pharmacy law) within the 2-year certification period.

- Continuing education hours can be earned from several different sources, including colleges, pharmacy associations, and pharmacy technician training programs.
- Up to 10 hours of continuing education also can be earned on the job under the direct supervision and instruction of a pharmacist.

## **Job Outlook**

US Department of Labor ~ BUREAU of Labor Statistics OCCUPATIONAL Handbook

<http://www.bls.gov/oco/home.htm>

- Employment is expected to **increase much faster than the average.**
- Job opportunities are expected to be good.
- As a result of job growth, the need to replace workers who leave the occupation, the limited number of training programs, the increasing numbers of middle-aged and elderly people—who use more prescription drugs than younger people—will continue to spur demand.
- In addition, as scientific advances lead to new drug products, and as an increasing number of people obtain prescription drug coverage, the need for pharmacy workers will continue to expand and be needed in growing numbers.

## **Employment Change between 2008 and 2018**

- Employment of pharmacy technicians is expected to **increase by 31 percent.**
- As cost-conscious insurers begin to use pharmacies as patient-care centers and pharmacists become more involved in patient care, pharmacy technicians will continue to see an expansion of their role in the pharmacy.
- In addition, they will increasingly adopt some of the administrative duties that were previously performed by pharmacy aides.
- As a result of this development, demand for pharmacy technicians will increase.

## **Job prospects**

- Job opportunities for pharmacy technicians are expected to be good, especially for those with previous experience, formal training, and certification.

- Job openings will result from employment growth, as well as the need to replace workers who transfer to other occupations or leave the labor force.

## **Projections Data**

Occupational Outlook Handbook Pharmacy Technicians, January 8th 2014:  
[www.bls.gov/ooh/healthcare/pharmacy-technicians.htm](http://www.bls.gov/ooh/healthcare/pharmacy-technicians.htm)

### **"Job Outlook**

Employment of pharmacy technicians is projected to grow 20 percent from 2012 to 2022, faster than the average for all occupations. Several factors will lead to increased demand for prescription medications."

Projections data from the National Employment Matrix

Occupational Title	SOC Code	Employment, 2008	Projected Employment, 2018	Change, 2008-18	
				Number	Percent
<b>Pharmacy technicians and aides</b>	—	381,200	477,500	96,300	25
<b>Pharmacy technicians</b>	29-2052	326,300	426,000	99,800	31
<b>Pharmacy aides</b>	31-9095	54,900	51,500	3,500	6

NOTE: Data in this table are rounded. See the discussion of the employment projections table in the *Handbook* introductory chapter on [Occupational Information Included in the Handbook](#).

Pharmacy technicians work under the supervision of pharmacists.

### **Quick Facts: Pharmacy Technicians**

#### **2012 Median Pay**

\$29,320 per year  
 \$14.10 per hour

#### **Entry-Level Education**

High school diploma or equivalent

#### **Work Experience in a Related Occupation**

None

<b><u>On-the-job Training</u></b>	Moderate-term on-the-job training
<b><u>Number of Jobs, 2012</u></b>	355,300
<b><u>Job Outlook, 2012-22</u></b>	20% (Faster than average)
<b><u>Employment Change, 2012-22</u></b>	70,700

## **SNAPSHOT Pharmacy Technicians**

REPORT California HealthCare Foundation, which, in partnership with The California Endowment, funds the California Workforce Initiative.

<http://www.oshpd.ca.gov/HWDD/HWC/RP-PharmTechn.pdf>

There are only three of our community colleges that offer an unrestricted similar Pharmacy Technology Program. They provide higher education pathways and career employment opportunities for the overwhelming majority of their graduates.

### CALIFORNIA Community Colleges

#### PHARMACY TECHNOLOGY PROGRAMS Comparisons

Please use this URL to retrieve your file

<http://www2.santarosa.edu/f/?nARAWYvw>

The Pharmacy Technology Program tailors instruction and training to match current standards while maintaining flexibility to quickly adjust to new information and the changing environment. With this foundation, faculty members must have the practical experience necessary to be a viable instructor.

Expertise crosses several educational and experiential domains: career combinations of safety, health sciences to relevant pharmacy, computer technology, skills training and instruction. This blend is a vital component to the development of Pharmacy Technology.

## 2.1a Budget Needs

## Pharmacy Technology Training Center

As addressed in the Pharmacy Technology Advisory Committee meetings over the last five years and planned in the previous PRPPs funding for the construction of the designated Pharmacy Technology Training Center status remains incomplete and pending.

### 2.3d Analysis of Faculty Staffing Needs and Rationale to Support Requests

- How difficult is it to recruit in the disciplines in this program/unit? When was the last time you interviewed for the adjunct pool in each discipline?  
**Very difficult due to pharmacist average salary in the private**

**sector is \$200,000 plus. Fall 2013, the program interviews routinely in December and July of each calendar year.**

- Does the program have adequate contract and adjunct faculty to support its needs? **Yes. Currently, have faculty for growth and diversification.**
- How many times in the past three years has the discipline/department interviewed for the adjunct pool. How many applicants were interviewed? How many applicants were added to the adjunct hiring pool? **In the past three years interviews have been held each December and July depending on candidate applications. Approximately six applicants were interviewed and five added to the adjunct hiring pool.**
- If release time, sabbaticals, and/or medical leaves are impacting your need for faculty, please explain. **Not applicable at this time.**
- Highlight any information from the PRPP (especially Section 5.0) that supports your request for each **specific** faculty staffing request. **None requested at this time.**
- How many contract faculty positions have been vacated in your department over the past six years (by location)? How many new contract faculty hires have you had in the past six years (by location)? **None at this time.**
- **Leadership succession planning continual.**
-

- \* Two leaders from Pharmacy Technology, Diana Rangaves and Rita Colthurst

### 3.5 Establish a Culture of Sustainability

Green Practices:

- No Paper Policy
- Students handouts posted on CATE
- Quizzes given via computer
- File Depot Uploads
- Several courses moved to online and hybrid

### 4.1a Course Student Learning Outcomes Assessment

**All Pharmacy Technology Program courses and Program have had all SLOs assessed as of May 2012.**

**The one exception is Pharmacy 100, as it has not been offered. Projected course offering Fall 2014, instructed by a pharmacist and/or pharmacy technician. All SLOs for this course will be assessed by December 2014.**

**Contextual pharmacy learning, peer instruction, interactive classroom activities have been implemented in the Pharmacy courses.**

**This projects real life expectations as employers demand.**

- If the curriculum is sequenced through prerequisite relationships, do course SLOs align from one course to the next in the sequence? Has this sequence or any part of a sequence been assessed in the past year and this current year? If so, describe how the results have been used to improve student learning.

**Yes. Yes, geared to student retention, engagement, an employability.**

- ACCJC Accreditation Standards require an ongoing, systematic cycle of assessment of all courses. At SRJC, our cycle is that at least one SLO in every course must be assessed every six years. In the text block provided, describe your six-year cycle of assessment. You can copy and paste into the text block a chart or a spreadsheet, which might be the easiest thing to do.

**All SLOs were assessed, next cycle 2017.**

Pharmacy Technology Assessments of all SLO have been completed Summer and Fall 2012 for:

(Exception as noted above: Pharmacy 100)

Pharmacy 150

Pharmacy 101

Pharmacy 150

Pharmacy 151

Pharmacy 152

Pharmacy 153

Pharmacy 154A

Pharmacy 154 B

Pharmacy 155

Pharmacy 156

Pharmacy 157

Pharmacy 157L

Pharmacy 255

Pharmacy 256.1

Pharmacy Technology Certificate Program

#### 4.1b Program Student Learning Outcomes Assessment

**Completed, next cycle 2017**

- There are two ways of assessing certificates and majors:
  - From the “bottom up”: As the department assesses the courses in the major, the major is also being assessed. Once all **required** courses have been assessed, the discipline/department should have a dialogue about how well the students are learning and achieving the certificate and major outcomes. Faculty should identify areas for improvement and a plan for addressing those.
  - From the “top down.” For some certificates and majors, for example in Health Sciences, it may make sense to assess from the

top down. In other words, faculty members could assess the certificate/major through assessing a capstone course, utilizing a standardized exam or licensure exam, evaluating a portfolio of student work, or surveying employers. Faculty should identify areas for improvement and a plan for addressing those.

**Pharmacy Technology program utilizes 'top down' method; the capstone course, licensure exam success rates, (SRJC graduates pass rate 100% versus National pass rates of 73%-1/31/2014), survey of employers who demand contextual learning in preparation of the real work environment and California State Board of Pharmacy licensure.**

- What certificates/majors(s) has the program/unit assessed over the past six years?

### **Pharmacy Technology Program Certificate and courses.**

- How have the results been used to improve student learning at the certificate/major level?

**Contextual learning, peer instruction, interactive classroom activities have been implemented in the Pharmacy courses.**

**This projects real life expectations as employers demand.**

## 4.2b Narrative (Optional)

### California State Board of Pharmacy Accreditation & Licensure

Upon successful completion of the program, students will be awarded the Pharmacy Technician Certificate and are qualified to apply to the California State Board of Pharmacy for registration as a Pharmacy Technician. Registration is a legal requirement for employment.

Concurrent to the didactic education, the training includes operation of equipment and computers pertaining to the practice of pharmacy, performance of dispensing procedures, interpreting and processing medication orders and prescriptions, experience in other advanced compounding, inpatient and specialty modalities, preparation of sterile intravenous products and infection control and safe handling of hazardous agents. This clinical training is required in hospitals, community pharmacies and specialty site partners affiliated with Santa Rosa Junior College.

Graduates of the certificate program are also encouraged to sit for the National Pharmacy Technician Certification Exam. While not currently a state requirement for employment, many employers provide increased compensation to Pharmacy Technicians once they become nationally certified.

Course and program SLOs and LAPs completed as required by AACJC.

## 5.0 Performance Measures

Pharmacy Technology program routinely measures employer feedback and training needs, via the Advisory Committee, employer and graduates surveys, one-to-one consultation, outreach, and preceptorships.

To that outcome the program develops student:

- Soft skills ~ <http://www2.santarosa.edu/f/?nBYYVxND>

- Best Practices and Competencies ~  
<http://www2.santarosa.edu/f/?nzXMEyVI>
- [Building on a Legacy of Excellence ~](http://www2.santarosa.edu/f/?nDQCFQCB)  
<http://www2.santarosa.edu/f/?nDQCFQCB>

Successful completion of the Pharmacy Technology Program allows for 100% of participants to apply for their California State Board of Pharmacy license and begin employment as a pharmacy technician.

Pharmacy Technician Certification Board SRJC Graduates Exam pass rates 100%

versus national of 73% (1/31/2014)

## 5.1 Effective Class Schedule: Course Offerings, Times, Locations, and Delivery Modes (annual)

- Is the program offering a **balanced** class schedule convenient to students with day, evening, Friday, and weekend courses, as needed? Explain.

Yes. The Santa Rosa Campus Program is a weekend college format, Friday and Saturdays.

- Is the program offering a good **geographic distribution** of classes, at Santa Rosa, Petaluma, Public Safety Training Center, and other sites? Explain.

Fall 2014 to expand offering of two courses Pharmacy 151 and Pharmacy 152 to the Petaluma Campus on Tuesday OR Thursday evenings 4 pm to 9 pm.

This will compliment the Santa Rosa Campus Saturday program coursework, allowing for an increased number of working individuals to have access.

- Does the program effectively use **alternative delivery modes** when appropriate such as online, online hybrid, or video transmission? Explain.

Yes, the Pharmacy Technology programs contains a combination of 100% online, hybrid and face to face.

100% online	Hybrid
Pharm 150	Pharm 155
	Pharm 157
	Pharm 154 A
	Pharm 154 B

- Can the program do a better job of serving students, and if so, how? State specific recommendations.

Offer two courses on the Petaluma campus and build the Pharmacy Technology Training Center.

- If the program/unit has a pattern or trend of declining or unstable enrollments over the past four years, what adjustment of course scheduling has the program implemented to address this? (For example, changing times of day, block scheduling, online offerings, short courses, adjusting frequency and number of sections, open entry-open exit classes, or rotation plans.)

Program growth trend over the past four years with completion of Student Success Survey and implementation.

- Describe any marketing efforts or outreach activities geared to increasing enrollments, if applicable.

Strong high school student outreach, Facebook, HOPE Center, Linked In, Pharmacy Technology listserv of 7000+ network.

is the program offering a balanced class schedule convenient to students with day, evening, Friday, and weekend courses, as needed?

- **Within the scope of the program and student needs for success with new 2 day per week schedule initiative implemented 2012/13 and moving forward.**

**Working as a collaborative team the Pharmacy Technology Program and faculty maintain Student Success is a priority. Student survey data supports Friday morning/afternoon and Saturday morning offering of courses beginning Fall 2013. Efficient utilization of resources to accommodate a large 60 student cohort will increase in college completion, and engagement.**

- Is the program offering a good **geographic distribution** of classes, at Santa Rosa, Petaluma, Public Safety Training Center, and other sites?
- **One college, multi-campus district the Pharmacy Technology Program new initiative is to offer one section of Pharmacy 152 (3 units on Wednesday 6-9 pm) beginning with the Fall 2013 semester.**
- **This will be multi-faceted in the creation of inclusiveness with Petaluma, student flexibility and resolve a like-load issue.**
- **This will compliment the existing Pharmacy 152 section on the Santa Rosa campus.**

- Does the program effectively use **alternative delivery modes** when appropriate such as online, online hybrid, or video transmission?
- **Currently, one course, Pharmacy 150, is fully online. The possibility exists to move four courses to the online hybrid delivery mode: Pharmacy 101, Pharmacy 151, Pharmacy 152, and Pharmacy 156.**
- **Pharmacy 157 moved to hybrid this year to begin Summer 2013.**
- **These courses will work well with online and face to face features.**
- **Request administrators support associated with action plan.**
- Is there demand for specific courses that is not being met? If so, what is the plan to address this?
- **Yes, demand for Pharmacy 153 and Pharmacy 157 doubled and was met with support by Mary Kay Rudolph and Ezbon Jen with another section has been added to the Pharmacy Technology Program. Thank you!**
- Can the program do a better job of serving students, and if so, how? State specific recommendations.
- **Yes, by offering one course at the Petaluma Campus, transition to a 2 day per week program, contextualized learning, flipped classroom, online/hybrid format, and an accurate and functional Pharmacy Technology Classroom.**
- **Request administrators support associated with action plan.**
- Describe any marketing efforts or outreach activities geared to increasing enrollments, if applicable.
- **HOPE Center, Career Day, hosting High School student tours website design, Social Media, Advisory Committee, Employer Organizations, Pharmacy Society, participation in Day Under the Oaks.**

Pharm 155

Uniform, compliance scheduling implemented to enhance student success, engagement, retention and allow program eligibility of Grant money for Career Tract Certificate Programs.

## 5.2a Enrollment Efficiency

Enrollment efficiency is a measure of the percentage of seats filled at first census, based on the class limit (not the room size). Enrollment efficiency provides some evidence about how effectively the schedule is developed. The District goal for enrollment efficiency is **95% or more** of seats filled at first census based on class limit for fall or spring, and **85%** for summer.

If your enrollment efficiency is **below the efficiency goal**, consider the following questions:

- Is the department scheduling more sections than demand warrants, particularly multiple sections of the same course?
- If the discipline has certificates or majors that are heavily sequenced or have many course requirements, could the required courses be offered on a rotation plan so that students secure the courses that they need within a one, two, or three year time frame? If so, students should be kept informed of the pattern.
- Does the program appeal primarily to day students or to evening students? Do you see different patterns of enrollment in day or evening that should be addressed?
- Could this program benefit from offering some sections online or through other delivery mechanisms, where greater flexibility might attract more students?

If your enrollment efficiency is **above the efficiency goal**, explain briefly how you maintain that efficiency.

If your enrollment efficiency is **very near 100% or over 100%**, it is quite possible that courses or programs are impacted. Consider the following questions:

- Can more courses be added to serve student needs?
- Is the discipline impacted for lack of instructors? If so, you should address your recruitment challenges (Section 2.3d) and perhaps justify the need for more full-time faculty (Section 2.3e).
- Is the discipline impacted for lack of space? If so, please explain your space needs and also include requests for new or additional space (Section 2.5a and 2.5b).

To answer these questions, review the following data:

- Academic Data 5.2a: Enrollment Efficiency. The percentage of seats filled in each discipline at first census based on class limit (not room size).

## Pharmacy Technician - FY 2012-13 (plus current FY Summer and Fall)

**5.2a Enrollment Efficiency** The percentage of seats filled in each Discipline at first census based on class limit (not room size).

This program is open to all students who wish to demonstrate the needed skills, discipline, and focus by priority. The 2013/2014 session has implemented a maximum of 60 student co-hort. This is twice the average class size.

The Pharmacy Technician Program enrollment efficiency is **very near 100% or over 100%**, and our courses or programs are impacted.

- Can more courses be added to serve student needs?

**Yes, functional, designated Pharmacy Technology space to accomodate co-hort of 60.**

**Pharmacy 152 request one section at the Petaluma Campus.**

**Students Served:** Next to the ADN Program, the Pharmacy Technician Program has the second largest student population enrollment in the Health Sciences Cluster.

Fall	2009	189	
Spring	2010	270	

- Is the discipline impacted for lack of instructors? If so, you should address your recruitment challenges (section 2.3d) and perhaps justify the need for more full-time faculty (section 2.3e).

**One full-time faculty was added with the 2011/2012 year. In the Fall this person implemented recruitment efforts. Pool interviews are held each semester.**

**Additionally, the 2 year process has begun for REVISIONS TO DISCIPLINES LIST to read:**

**Pharmacy Technology *Pharmacy Technician National Certification (CPhT) and four years of experience, Any bachelor's degree and two years of professional experience, or any associate degree and six years of professional experience.***

- Is the discipline impacted for lack of space? If so, please explain your space needs and also include requests for new or additional space (facilities section 2.5a and 2.5b).

**Pharmacy Techology requires functional and designated Classroom and Skills Lab.**

11\_0809\_SRJC\_Pharm\_Tech\_Lab\_Program\_Document.pdf 399.87K Pharmacy Technician Lab Document PRIVATE "TYPE=PICT;ALT=Open Calendar"<http://www2.santarosa.edu/f/?35810>

- Is the discipline impacted because it is a high demand field? If so, is it possible to expand the program or create new initiatives to address community needs? (Address new initiatives and program expansion in section 6.3b).

**Yes. The Pharmacy Technology Program is positioning itself for Endowment via Naming Opportunity and Grant money for Career Tract Programs, Walk of Gratitude, and perpetual funding revenue.**

- **Job Outlook**

US Department of Labor ~ BUREAU of Labor Statistics OCCUPATIONAL Handbook  
<http://www.bls.gov/oco/home.htm>

- Employment is expected to increase much faster than the average, and job opportunities are expected to be good.
- As a result of job growth, the need to replace workers who leave the occupation, the limited number of training programs, the increasing numbers of middle-aged and elderly people—who use more prescription drugs than younger people—will continue to spur demand.
- In addition, as scientific advances lead to new drug products, and as an increasing number of people obtain prescription drug coverage, the need for pharmacy workers will continue to expand and be needed in growing numbers.

**Employment Change between 2008 and 2018**

- Employment of pharmacy technicians is **expected to increase by 31 percent.**

- As cost-conscious insurers begin to use pharmacies as patient-care centers and pharmacists become more involved in patient care, pharmacy technicians will continue to see an expansion of their role in the pharmacy.
- In addition, they will increasingly adopt some of the administrative duties that were previously performed by pharmacy aides.
- As a result of this development, demand for pharmacy technicians will increase.

### **Job prospects**

- Job opportunities for pharmacy technicians are expected to be good, especially for those with previous experience, formal training, and certification.
- Job openings will result from employment growth, as well as the need to replace workers who transfer to other occupations or leave the labor force.

### **Projections Data**

Projections data from the National Employment Matrix

Occupational Title	SOC Code	Employment, 2008	Projected Employment, 2018	Change, 2008-18	
				Number	Percent
<b>Pharmacy technicians and aides</b>	—	381,200	477,500	96,300	25
<b>Pharmacy technicians</b>	29-2052	326,300	426,000	99,800	31
<b>Pharmacy aides</b>	31-9095	54,900	51,500	3,500	6

NOTE: Data in this table are rounded. See the discussion of the employment projections table in the *Handbook* introductory chapter on [Occupational Information Included in the Handbook](#).

### **SNAPSHOT Pharmacy Technicians**

REPORT California HealthCare Foundation, which, in partnership with The California Endowment, funds the California Workforce Initiative.

<http://www.oshpd.ca.gov/HWDD/HWC/RP-PharmTechn.pdf>

- There are only three of our community colleges that offer a Pharmacy Technology Program.

- They provide higher education pathways and career employment opportunities for the overwhelming majority of their graduates.

## California training programs for pharmacy technicians

**Type of program**    **number**  
 Community college    3  
 Adult education/ROP    8  
 Proprietary/vocational college 39

**6.3b). 5.2a Enrollment Efficiency** The percentage of seats filled in each discipline at first census based on class limit (not room size).

## 5.2b Average Class Size

Average class size is the average number of students enrolled in all sections at first census (total enrollment at first census divided by the number of sections, excluding cancelled sections). Average class size can be an important factor for faculty staffing requests. Class size may be based on past practice, but there are often other reasons as well. If so, explain those.

- Explain any trends in average class size, whether increasing or decreasing.
- Explain any limits on class size, such as pedagogical limits, regulatory mandates, or facilities constraints.

To answer these questions, review the following data:

- Academic Data 5.2b: Average class size in each discipline at first census (excludes cancelled classes).

# Pharmacy Technician - FY 2012-13 (plus current FY Summer and Fall)

**5.2b Average Class Size** The average class size in each Discipline at first census (excludes cancelled classes).

## Santa Rosa Campus

### 5.3 Instructional Productivity

The Productivity ratio is defined as FTES divided by FTEF (see explanation below). The District goal for productivity is **18.7** full-time equivalent students for each full-time equivalent faculty member, a ratio of **18.7** to 1. On an annual basis, that would be 35 FTES per FTEF. What this means is that on average each instructional faculty member is able to teach 18.7 full time equivalent students each semester or **37.4** full-time equivalent students per academic year.

- If your program's productivity ratio is **lower than 18.7**, explain any circumstances that contribute, such as limitations of facilities, regulations, special pedagogy, or scheduling challenges.
- If your program's productivity ratio is **18.7 or higher**, describe how you maintain that productivity.
- Explain any trends that you see in productivity.
- Recommend ways the program could improve productivity.

*Analysis Tips: For most purposes, such as schedule development or PRPP, Academic Affairs generally looks at productivity per semester or per term.*

**FTEs:** Full-Time Equivalent Students (FTES) is a way of expressing enrollments in terms of equating enrollment with full-time students. A full-time student is assumed to attend classes for 525 hours per year (15 hours per week x 35 weeks = 525).

**FTEF:** Full-Time Equivalent Faculty (FTEF) is the total instructional load of all faculty in a given time frame (usually a semester), including both full-time and part-time faculty. For example, 1.0 FTEF = 100% load or 4.25 FTEF = 425% load. FTEF data reflects instructional load **only** and does not include reassigned time, such as department chair reassigned time.

**Instructional Productivity Ratio:** The instructional productivity ratio is FTES divided by FTEF (FTES/FTEF). This ratio relates faculty load to the number of full-time equivalent students served. Ideally, the college as a whole should have an instructional productivity of **18.7** per term. This productivity is roughly achieved when the average class size for lecture is 37.4 and the average class size for lab is slightly over 25. Class sizes may vary in different disciplines due to the pedagogical demands, and in general courses with larger class sizes help to balance out courses with smaller class size.

## Pharmacy Technician - FY 2012-13 (plus current FY Summer and Fall)

**5.3 Instructional Productivity** The ratio of Full-Time Equivalent Students (FTES) to Full-Time Equivalent Faculty (FTEF) in each Discipline at first census.

- If your program’s productivity ratio is **18.7** or higher, describe how you maintain that productivity.

**Projected Pharmacy Technology Program productivity will continue to due to favorable economic and job market expansion.**

## 5.4 Curriculum Currency

Academic Affairs will provide a list of the curriculum for each discipline and when it was last reviewed. All curriculum should be reviewed on a six-year cycle. Curriculum that has not been reviewed in the past six years needs to go through a full review and be brought current. It is helpful if the department chair or program coordinator develops a plan and assigns specific faculty with the necessary expertise to update certain courses.

- Is the curriculum current? (Current means that each course has been updated within the last SIX academic years, although courses submitted for articulation to UC should be reviewed within the past FIVE years, especially if seeking articulation.)
- If not, what is the plan to bring curriculum current?
- On the curriculum spreadsheet provided, delete any courses from the lists that are no longer active or that you will not offer in the future. Send this list of deletions to the office of the Dean of Curriculum, Educational and Support Services.

To answer these questions, review the following data:

Data: Curriculum Currency Spreadsheet (data provided by Academic Affairs Curriculum Office)

Pharmacy Curriculum is current. Review ongoing and flexibility of topics exist within courses.

All Pharmacy Courses are current and have been reviewed by CRC.

## 5.5 Successful Program Completion

- Describe any course sequencing or course rotation plans that allow a student to complete their certificate/degree/major in a reasonable time frame.

Pharmacy Technology program is a 3 semester program.

- Does the program offer support or services to help students complete certificates, licensure, or majors? If so, describe those.

Yes, throughout the program continued education is supported during orientation, coursework, licensure presentations and faculty student 1: 1 contact.

- Review the trends in numbers of degrees or certificates awarded, and, if possible, explain the trend. Data are posted on the PRPP web site: [www.santarosa.edu/prpp](http://www.santarosa.edu/prpp).

**Upward trend in alignment with projected industry growth and program reputation or excellence.**

- If available and applicable, provide data about student success rates on licensure exams or external/industry examinations or certifications. (Note: you can copy and paste that information into this text block.) If applicable, recommend ways to improve certificate, licensure and major completion overall and by targeted groups, as appropriate. "Targeted groups" could be defined by gender, age, ethnicity, disability status and income.

100% of graduates are eligible for licensure. Additional certification by the Pharmacy Technician Certificate Board is a 100% pass rate (January 2014)

- If these data are available, what has been the history of employment or job placement following the certificate or majors in your program/unit? What is the employment outlook over the next three years? If applicable, recommend ways to improve employment or job placement.

Program Director has established network for job opportunity referrals, announcements, RSS job link feeds which are sent out to graduates via Pharmacy Tech listserv. Employment outlook strong.

To answer these questions, review the following data:

Number of certificates awarded, trend (posted on the PRPP web site: [www.santarosa.edu/prpp](http://www.santarosa.edu/prpp)).

- Number of majors awarded (posted on the PRPP website: [www.santarosa.edu/prpp](http://www.santarosa.edu/prpp)).
- Number of licenses secured and the trend (program/unit must provide).

## 5.8 Curriculum Offered Within Reasonable Time Frame

Pharmacy Technology is a 3 semester, year program rotation.  
Summer, Fall, Spring.

This maintains, currency, retention of students, knowledge retention by students, enhancing student success and completion.

- If courses are offered in rotation, describe the rotation plan or copy and paste into the text area a schedule of course offering patterns. (Data Source: Program must provide.)

Summer Pharmacy 150

Fall Pharmacy 100, 101, 151, 152, 154 A

Spring Pharmacy 153, 154B, 155, 156

## 5.9a Curriculum Responsiveness

Bi-annually at the Pharmacy Technician Advisory Meetings the first Saturdays in May and November.

### **5.9 Curriculum Responsiveness (every third year)**

- How does the program/unit curriculum respond to changing student, community, and employer needs?

**Pharmacy Technology Program faculty work in the field, maintain connections and continuing education, and have relevant Advisory Committee Members. Trends and workforce needs reviewed every 6 months.**

- Has your program/unit fully complied with the State requirement that every general education course that transfers to a CSU or UC campus must include objectives (content) related to gender, global perspectives, and American cultural diversity? If not, describe the plan to bring the curriculum into compliance.

**Yes.**

- How does the curriculum support the needs of other programs, certificates, or majors?

**Qualifies with the AS and AA degrees.**

- Offer recommendations and describe plans for new directions in the curriculum.

**Computer skills, programs and insurance, workflow, hands-on preparation for the workforces with the architecturally accurate and fully functional Pharmacy Technology Training Center under development.**

- **How does the curriculum support the needs of other programs, certificates, or majors?**

Whenever we can, specifically, SRJC Workforce Mentor/Protege Project, pre-pharmacy transfer curriculum, and AS/AA majors.

- **Offer recommendations and describe plans for new directions in the curriculum.**

Offer at the Petaluma campus to capture geographic student population.

#### CTE Only:

- How many advisory committee members attend your meetings that represent industry?

**Twenty to 25 each May and November.**

- How many of these members represent industry and also serve as adjunct faculty?

**Seven.**

- Is the diversity of membership on your advisory committee representative of the fields in which students will be entering upon completion of your degree, certificate or major? If not, what is your plan to diversify membership?

**Yes, multiple employment markets are represented.**

- In the past year, has the advisory committee reviewed your curriculum for currency?
  - If not, why?
  - If so, what changes were implemented as a result of this feedback?

**Yes, the addition and implementation of ethics, conceptual math skills, interactive student learning, IV inpatient training, compounding, and insurance concepts.**

**Under development the Pharmacy Technology Training Center.**

Does this position support collaborative efforts with other colleges in the region?

## Yes, our program is a participant in the California Community Colleges Workforce.

List of courses and course descriptions

### **Pharmacy 150**

An introduction to the role and working environment of the pharmacy technician, in both inpatient and outpatient settings. In addition to the legal responsibilities, technical activities and common medications encountered, the pharmacy technician student will identify and interpret common prescriptions and conduct simple pharmaceutical mathematics

### **Pharmacy 100**

Instruction in advanced arithmetic skills designed for Health Science students. Prepares students for success in medication administration through advanced skills development of operations with fractions, decimals, and percents. Teaches students to convert between metric, household, and apothecary systems, using proportion, equation, and formula methods. Introduces and develops advanced skills in calculating drug dosages in preparation for safe administration of medications in the health field.

### **Pharmacy 101**

Prepares students for success in the application of learned theory. The development of necessary discernment, reason, and proficiencies with regard to pharmaceutical solutions, volumes, formulas, compounds, dosages, and dosing. Application of numeric systems, theorems, principles, postulates, and provisions to enable the student to perform at an advanced level of pharmaceutical care and service.

### **Pharmacy 151**

An introduction to pharmacological principles as they are related to and support an understanding of the rationale behind drug prescribing and usage impacted by the United States Pharmacopoeia and federal and state regulations.

### **Pharmacy 152**

An overview of the skills needed to operate effectively in an ambulatory setting, with emphasis on receiving and controlling inventory, processing prescriptions using computerized prescription processing, medical insurance billing, and customer relations.

### **Pharmacy 153**

Calculation of the correct oral and parenteral dosages of drugs using information from prescriptions or medications orders. Accurate interpretation of the correct amount of ingredients for the compounding of pharmaceutical products from a prescription or medications order.

### **Pharmacy 154 A**

The practice, in outpatient environment, of pharmacy technician skills developed in didactic and laboratory training. Activities will be performed by the student and evaluated by a supervising licensed pharmacist.

### **Pharmacy 154 B**

The practice, in an outpatient environment, of advanced pharmacy technician skills developed in didactic and laboratory training. Activities will be performed by the student and evaluated by a supervising licensed pharmacist.

### **Pharmacy 155**

This course introduces the pharmacology technician student to the historical development of the use of medicinal drugs, the basic mechanism of drug action, pharmacokinetics and basic concepts related to the administration of pharmacologic agents. Therapeutic effects of identified groups of drugs, their side effects, interactions and potential error sites are integrated throughout the course. Focus is on selected drug classes.

### **Pharmacy 156**

General preparation of topical, transdermal, rectal, ophthalmic, nasal, oral and otic pharmaceutical dosage forms. Practical experience in the manipulative and record keeping functions associated with the compounding and dispensing of prescriptions. Study of dosage forms, advantages and disadvantages, uses, storage and packing of pharmaceutical products.

### **Pharmacy 157**

This course is designed to prepare the Pharmacy Technician for employment in an inpatient hospital setting including employment as a fill technician and/or IV compounding technician.

### **Pharmacy 157 L**

The practice, in a hospital pharmacy environment, of advanced pharmacy technician skills developed in didactic and laboratory training. Activities will be performed by the student and evaluated by a preceptor.

## 5.9b Alignment with High Schools (Tech-Prep ONLY)

### **5.9b Alignment with High Schools (Tech-Prep ONLY, every third year)**

- Does the program align with high school preparation?

Student and instructor participation in Career Fairs, Piner HS Tour, Outreach with Michelle, speaker opportunities, HOPE Center, and mentoring and employer programs.

For the last 3 years, the Pharmacy Technology Program at Santa Rosa Junior College has been in collaboration with:

HOPE Center, Juan Arias [jarias@santarosa.edu](mailto:jarias@santarosa.edu)

Schools Relations & Outreach, Michelle Booher-Poggi 707.521.7854

Most recently, the Small Schools Event, on Friday, February 7, 2014. The Schools Relations and Outreach is hosted a group of high school Seniors and their Counselors/Teachers from a number of the District's small high schools promoting medical careers and programs. The outreach plans for 210 students and 45 adults.

In January 2014 the Pharmacy Technology Program participated in the Santa Rosa Plaza Outreach Event. Karla Turcios, Pharmacy Technician candidate June 2014, volunteered working four days, (1/5-1/8) with Admission and Records. We were very happy that she did. She is a very pleasant and professional young woman and she is definitely a great representative for the college.

In the Fall 2013 issue of Making Tracks to SRJC, SRJC Welcomes High School Concurrent Enrollment Students for Spring 2014. The Pharmacy Technology Program implemented a streamlined, easy process for high school students to participate in the program. They may take a course or courses concurrently and have a Pharmacy Technician Certificate and career by the time they are 18 years of age.

[http://www.santarosa.edu/for\\_students/schools-relations/making-tracks-to-SRJC/pdf/Fall\\_2013.pdf](http://www.santarosa.edu/for_students/schools-relations/making-tracks-to-SRJC/pdf/Fall_2013.pdf)

The Santa Rosa Junior College Pharmacy Technology Program Advisory Board comprises multi-dimensional talent from all business, institutional, and political sectors.

Our program contributed to the Contextual Learning Project for Pharmacy 153 Dosage Calculations and Pharmacy 101 Ethics. We teamed with Audrey White, Math Department and Ann Foster, English Department to achieve our goals within a flipped classroom, interactive participation, and peer instruction environment. This more closely aligned with the employment environment and the development of the much requested 'soft skills'.

The Counseling Department is dynamically informed. The Pharmacy Technology Program is hosting an Informational Session, Saturday, April 12th from 10 am to 11 am in Race 4044. This was also sent to High School counselors.

SRJC Pharmacy Technician website:

<http://online.santarosa.edu/presentation/page/?28999>

On January 30th, 2014 School performance reporting from the Pharmacy Technician Certification Board (PTCB) was reported on the Pharmacy Technician Certification Exam (PTCE). Summary Results for Santa Rosa Junior College, Santa Rosa CA:

SRJC Pharm Tech Percentage of Candidates Passed: 100%

National Average: 73%

SRJC Percentage of Candidates Failed: 0%

National Average: 27%

## 5.10 Alignment with Transfer Institutions (Transfer Majors ONLY)

Pharmacy Technology Program aligns with AA/AS as 25 qualifying units.

Additionally, 1-2 % of Pharmacy Technology students move forward in higher education to Doctors of Pharmacy.

## 5.11a Labor Market Demand (Occupational Programs ONLY)

### **JOB OUTLOOK and PROGRAM COMPARISONS**

#### **Unemployment Insurance Data: [www.edd.ca.gov](http://www.edd.ca.gov)**

<http://www.labormarketinfo.edd.ca.gov/OccGuides/Summary.aspx?Soccode=292052&Geography=0601000000#FHOutlook>  
<http://www.labormarketinfo.edd.ca.gov/OccGuides/Summary.aspx?Soccode=292052&Geography=0601000000#FHOutlook>

"Along with new jobs, the need to replace workers who retire, transfer to other occupations, or leave the labor force will increase the number of job openings".

*A licensed pharmacy technician find employment in retail pharmacies, hospital pharmacies, home health care pharmacies, nursing home pharmacies, clinic*

*pharmacies, mail order prescription pharmacies, and with pharmaceutical companies. Employment opportunities for graduates of community college Pharmacy Technician programs are excellent. Changes in the California State Pharmacy Law requiring registration have created an increasing demand for trained pharmacy technicians.*

**US Department of Labor ~ BUREAU of Labor Statistics OCCUPATIONAL Handbook**

<http://www.bls.gov/oco/home.htm>

<http://www.bls.gov/ooh/healthcare/pharmacy-technicians.htm>

"Employment of pharmacy technicians is projected to grow 20 percent from 2012 to 2022, faster than the average for all occupations. Several factors will lead to increased demand for prescription medications."

Employment is expected to increase much faster than the average, and job opportunities are expected to be good. As a result of job growth, the need to replace workers who leave the occupation, the limited number of training programs, the increasing numbers of middle-aged and elderly people—who use more prescription drugs than younger people—will continue to spur demand. In addition, as scientific advances lead to new drug products, and as an increasing number of people obtain prescription drug coverage, the need for pharmacy workers will continue to expand and be needed in growing numbers.

- Employment is expected to **increase much faster than the average.**
- Job opportunities are expected to be good.
- As a result of job growth, the need to replace workers who leave the occupation, the limited number of training programs, the increasing numbers of middle-aged and elderly people—who use more prescription drugs than younger people—will continue to spur demand.
- In addition, as scientific advances lead to new drug products, and as an increasing number of people obtain prescription drug coverage, the need for pharmacy workers will continue to expand and be needed in growing numbers.

**Employment Change between 2008 and 2018**

- Employment of pharmacy technicians is expected to **increase by 31 percent.**
- As cost-conscious insurers begin to use pharmacies as patient-care centers and pharmacists become more involved in patient care, pharmacy technicians will continue to see an expansion of their role in the

pharmacy. In addition, they will increasingly adopt some of the administrative duties that were previously performed by pharmacy aides.

- As a result of this development, demand for pharmacy technicians will increase.

### **Job prospects**

- Job opportunities for pharmacy technicians are expected to be good, especially for those with previous experience, formal training, and certification.
- Job openings will result from employment growth, as well as the need to replace workers who transfer to other occupations or leave the labor force.

### **Projections Data**

Occupational Outlook Handbook Pharmacy Technicians, January 8th 2014:  
[www.bls.gov/ooh/healthcare/pharmacy-technicians.htm](http://www.bls.gov/ooh/healthcare/pharmacy-technicians.htm)

### **"Job Outlook**

Employment of pharmacy technicians is projected to grow 20 percent from 2012 to 2022, faster than the average for all occupations. Several factors will lead to increased demand for prescription medications."

Projections data from the National Employment Matrix

Occupational Title	SOC Code	Employment, 2008	Projected Employment, 2018	Change, 2008-18	
				Number	Percent
<b>Pharmacy technicians and aides</b>	—	381,200	477,500	96,300	25
<b>Pharmacy technicians</b>	29-2052	326,300	426,000	99,800	31
<b>Pharmacy aides</b>	31-9095	54,900	51,500	3,500	6

NOTE: Data in this table are rounded. See the discussion of the employment projections table in the *Handbook* introductory chapter on [Occupational Information Included in the Handbook](#).

Pharmacy technicians work under the supervision of pharmacists.

## Quick Facts: Pharmacy Technicians

<b><u>2012 Median Pay</u></b>	\$29,320 per year \$14.10 per hour
<b><u>Entry-Level Education</u></b>	High school diploma or equivalent
<b><u>Work Experience in a Related Occupation</u></b>	None
<b><u>On-the-job Training</u></b>	Moderate-term on-the-job training
<b><u>Number of Jobs, 2012</u></b>	355,300
<b><u>Job Outlook, 2012-22</u></b>	20% (Faster than average)
<b><u>Employment Change, 2012-22</u></b>	70,700

## **SNAPSHOT Pharmacy Technicians**

REPORT California HealthCare Foundation, which, in partnership with The California Endowment, funds the California Workforce Initiative.

<http://www.oshpd.ca.gov/HWDD/HWC/RP-PharmTechn.pdf>

There are only three of our community colleges that offer an unrestricted similar Pharmacy Technology Program. They provide higher education pathways and career employment opportunities for the overwhelming majority of their graduates.

The Pharmacy Technology Program tailors instruction and training to match current standards while maintaining flexibility to quickly adjust to new information and the changing environment. With this foundation, faculty members must have the practical experience necessary to be a viable instructor.

Expertise crosses several educational and experiential domains: career combinations of safety, health sciences to relevant pharmacy, computer technology, skills training and instruction. This blend is a vital component to the development of Pharmacy Technology.

## **SNAPSHOT Pharmacy Technicians**

### 5.11b Academic Standards

- Does the program regularly engage in dialogue about academic standards? If so, describe any conclusions or plans.

Yes, ongoing to exceed competencies.

#### **Competency Profile For Pharmacy Technicians** \*

*The Pharmacy Technician Competency Profile was developed by using three assumptions about the pharmacy technician's role and eight expectations of pharmacy technicians who will practice within the proposed expanded role.*

#### **Assumptions**

Upon registration by the Santa Rosa Junior College, pharmacy technicians will:

1. Act within the established parameters of the role as outlined by the College and will comply with the College's professional standards, practice expectations, and, where established, will follow applicable policies and procedures of the College and/or the workplace
2. Exercise professional judgment related to the technical and distributive aspects of dispensing in the expanded role
3. Recognize practice situations in which decisions and actions must involve the pharmacist; those in which consultation with the pharmacist or, where appropriate, with other registered pharmacy technicians can occur; and those decisions and actions that can be undertaken independently. Pharmacy technicians exercise critical-thinking, problem-solving, decision-making, and judgment to

differentiate among these three contexts

### **Expectations**

Pharmacy technician students registered with the College will be personally responsible and professionally accountable to practice knowledgeably, safely, and competently to support the best interests of patients by:

1. Knowing and complying with all provincial and federal legislation and regulations relevant to pharmacy and their role as pharmacy technicians within pharmacy practice; with professional standards and practice expectations and guidelines; and with policies and procedures where established

2. Using critical-thinking and decision-making skills appropriate to the pharmacy technician role

Critical thinking is the foundation for making safe, patient care-focused decisions. It is the process of integrating one's relevant theory, experience, and observations, as well as recognizing similarities/differences/changes in context and situations into a whole. Critical thinking by pharmacy technicians should be consistent with the technician's level of education, training, experience, and scope of practice. Decision-making by technicians should involve the ability to question effectively, to seek out guidance and information, to incorporate information, and to select those options, from a variety of options, that result in safe and competent technician practice.

3. Performing, safely and competently, the technical and distributive aspects of dispensing as permitted by law, professional standards, practice guidelines and expectations, and applicable policies and procedures.

4. Demonstrating the judgment required to identify the need for pharmacist intervention and to notify the pharmacist of this need.

5. Demonstrating the judgment and safe practices required to: receive and enter written, orally, and electronically transmitted new and repeat prescriptions; differentiate changes to patient profiles or health records, and notifying the pharmacist when these occur; prepare, compound, and check pharmaceutical products; and collaborate with the pharmacist in their release

6. Acting within the limits of the expanded professional role and personal knowledge and skills

While it is anticipated that as pharmacy technicians mature within their professional roles they will demonstrate quality improvement related to increased knowledge and experience in the expanded role: All registered pharmacy technicians will be held accountable to the

public to not exceed the legislated parameters of their roles  
7. Behaving in a professional manner; acting within an ethical framework at all times; and demonstrating personal integrity

8. Engaging in quality assurance activities including a commitment to life-long learning; and identification, implementation, and evaluation of learning plans, activities, and opportunities

Furthermore, entry-level pharmacy technician students in the expanded role will:

1. Be registered in Santa Rosa Junior College, thus entitled to the rights of, and be expected to comply with the responsibilities of, a self-regulating profession; and

2. Possess the essential knowledge, skills, values, and judgment required to demonstrate these Competencies

However, entry-level pharmacy technician students may have differing experiences as they enter the role — given the variety of environments in which learning and practice occur. Therefore, the College will engage in a process that will ensure consistent benchmarks for entry.

### **Summary**

We recognize that any expansion into the technical and distributive aspects of dispensing (outlined in this Profile) will require the College to support this new role through appropriate legislation and regulation, creation of a registered class, and regulatory infrastructure that will ensure consistent benchmarks for technicians' entry into, and continuance in, the expanded role.

This Profile offers a clear picture of the requirements of the expanded technician role and goes beyond the current definition and framework of the voluntary certification program. Enabled by legislation and supported by complementary professional standards, practice expectations, and regulatory framework, the Profile will support optimal pharmaceutical care and pharmacy services to the public.

\*Wed 4/11/2007 5:57 AM

Hello, Diana- Thank you for your interest and for asking permission to use the Pharmacy Technician Objective Competencies. Absolutely you may use these and thank you for acknowledging the College as providers of this information.

**A: COMPETENCY: PRACTICE IN A PROFESSIONAL MANNER THAT IS WITHIN LEGAL REQUIREMENTS AND AN ETHICAL FRAMEWORK**

**A1.0 COMPETENCY UNIT**

Comply with legal requirements; demonstrate professional integrity; and act ethically.

**COMPETENCY ELEMENTS**

**A1.1** Use critical-thinking skills in all situations

**A1.2** Comply with federal and provincial legislation, professional standards, ethical guidelines, practice expectations, and established policies and procedures

Keep current with, apply knowledge of, and work within relevant legislation, regulations, policies and procedures

i) Recognize the right, role, and responsibility of regulatory bodies to establish and monitor professional standards, ethical guidelines, and practice expectations

ii) Keep current with, and work within, professional standards, practice expectations, ethical guidelines, and, where provided, established policies and procedures

**A1.3** Demonstrate professional and personal integrity

i) Accept responsibility for own decisions and actions

ii) Practice within the limits of professional role and personal knowledge and expertise

iii) Integrate professional knowledge, skills, values, and judgment into practice

iv) Respect the rights, roles, and responsibilities of the patient, the patient's agent, the pharmacy team, healthcare providers, and others

v) Act as a role model and mentor

vi) Respect the roles and collaborate with members of the pharmacy team

vii) Behave professionally

viii) Maintain confidentiality

**A1.4** Take responsibility for own professional development

i) Reflect upon own practice to identify learning needs

ii) Develop, implement, evaluate, and update learning plans to gain knowledge and experience and to maintain and improve practice

iii) Seek out and incorporate into practice, information, guidance and constructive feedback from the pharmacist and/or, if required, from other healthcare professionals

iv) Demonstrate evidence-based knowledge, appropriate to their role

v) Commit to life-long learning

**A1.5** Apply ethical principles to practice

- i) Ensure that the professional role, responsibilities, actions, and behaviors are carried out in the best interest of the patient and the public
- ii) Reflect on personal values and attitudes and examine their influence on interactions with the patient, the patient's agents, members of the pharmacy team, healthcare providers
- iii) Respect diversity

**A1.6** Protect patient rights to quality care, dignity, privacy, and confidentiality

**A1.7** Understand and promote the pharmacy team's role in promoting patients' health and wellness

**A1.8** Contribute to team problem-solving, decision-making, and collaboration by developing effective working relationships, using team-building strategies, communicating effectively, and by supporting members of the pharmacy team

**B: COMPETENCY: RECEIVE A PRESCRIPTION**

Pharmacy technicians, as part of the pharmacy team, use their knowledge and skills and follow applicable policies & procedures to:

**B1.0** COMPETENCY UNIT

Receive a new written prescription, or a request to renew a prescription, from a patient or patient's agent.

**COMPETENCY ELEMENTS**

**B1.1** Gather information to create and maintain a patient profile or health record

- i) Obtain patient consent where required
- ii) Differentiate when there are changes in the drug and dosage, the patient profile or health record and, where provided, the diagnosis or medical condition; and notify the pharmacist
- iii) Update demographic and prescription data
- iv) Use paper-based, electronic, and other resources to locate and select information

**B1.2** Check authenticity of the prescription

- i) Determine whether the prescription meets all legal requirements, and, where it does not, notify the pharmacist, and follow up using applicable policies, effective communication, and discretion
- ii) Use healthcare provider lists, where available, to determine current status of prescriber's privileges

**B1.3** Verify accuracy and completeness of the demographic and prescription data

- i) Check the demographic and prescription data for accuracy and

completeness

- ii) Review the prescription for clarity of abbreviations, medical terminology, drug names, dosage forms, strengths, availability, schedule, route, and related information
- iii) Notify the pharmacist regarding known allergies, therapeutic considerations, and/or discrepancies.

## COMPETENCY ELEMENTS

**B2.1** Receive a written prescription from the patient or agent.

- i) Use effective communication skills, and where available, established communication policies, procedures, or guidelines when receiving an written prescription
- ii) Verify demographic and prescription data with the healthcare provider
- iii) Refer therapeutic questions to the pharmacist
- iv) Transcribe an written prescription by:
  - Using appropriate format, abbreviations, drug names, dosage forms, strengths, availability, schedule, route, and related information
  - Checking that the transcribed demographic and prescription data are accurate and complete

**B2.2** Gather information to create and maintain the patient profile or health record

- i) Differentiate when there are changes in the drug and dosage, the patient profile or health record, and, where provided, the diagnosis or medical condition; and notify the pharmacist
- ii) Update demographic and prescription data
- iii) Use paper-based, electronic, and other resources to locate and select information

**B2.3** Check for authenticity of orally and electronically transmitted prescriptions

- i) Determine whether the prescription meets all legal requirements: when it does not, notify the pharmacist and follow up by using applicable policies, effective communication, and discretion
- ii) Use healthcare provider lists, where available, to determine current status of prescriber's privileges

**B2.4** Verify accuracy and completeness of orally and electronically transmitted demographic and prescription data

- i) Notify the pharmacist on known allergies, therapeutic considerations, and/or discrepancies
- ii) Check the demographic and prescription data for accuracy and completeness
- iii) Review the prescription for clarity on: abbreviations, medical terminology, drug names, dosage forms, strengths, availability, schedule, route, and other related information

## B3.0 COMPETENCY UNIT

Transfer/copy a prescription in compliance with relevant legislation and established policies and procedures.

### COMPETENCY ELEMENTS

**B3.1** Transfer a prescription to another pharmacy

- i) Confirm that the patient or the patient's agent has approved/requested the transfer
- ii) Ensure accuracy and completeness before transferring a prescription
- iii) Complete required documentation

**B3.2** Receive a transfer or copy of a prescription from another pharmacy

- i) Receive/transcribe the prescription, gather information, verify accuracy and completeness of the demographic and prescription data, and check for authenticity
- ii) Complete required documentation

**B3.3** Provide a copy of a prescription to an authorized recipient

- i) Ensure accuracy and completeness of demographic and prescription data
- ii) Complete required documentation

### **C: COMPETENCY: ENTER A PRESCRIPTION**

Pharmacy technicians, as part of the pharmacy team, use their knowledge and skills and follow applicable policies and procedures to:

#### **C1.0** COMPETENCY UNIT

Enter a prescription as part of the processes used to prepare a pharmaceutical product for release and to keep records.

### COMPETENCY ELEMENTS

**C1.1** Enter and update demographic information in the patient profile or health record while ensuring privacy and confidentiality

- i) Verify accuracy and completeness of demographic information with the patient, the patient's agent, or the patient's healthcare provider

**C1.2** Enter prescription data into the patient profile or health record

- i) Confirm accuracy, completeness, and authenticity of the prescription data and notes
- ii) Use correct format, terminology, abbreviations, and symbols
- iii) Associate drug names and classifications with common health conditions

**C1.3** Notify the pharmacist of any alerts or therapeutic issues

- i) Differentiate when there are changes in the drug and dosage, the patient profile or health record, and, where provided, the diagnosis or medical condition
- ii) Review the patient profile or health record for alerts

- iii) Review the patient notes for patient preferences
- iv) Contact the patient or patient's agent to provide or retrieve relevant information or instructions
- v) Review current patient profile or health record to note duplicate therapies and active prescriptions on file
- vi) Notify the pharmacist of any changes and compliance issues

**C1.4** Enter the pharmaceutical product/compound that meets the requirements of the prescription

- i) Determine patient preferences
- ii) Apply knowledge about available forms of the pharmaceutical product
- iii) Apply knowledge of third-party insurance plan coverage

**C1.5** Verify that the entry of the demographic and prescription data is accurate and complete

- i) Compare demographic and prescription data entered into the record against information contained in the written prescription received, the electronically transmitted prescription, or the transcribed oral prescription

## **D: COMPETENCY: PREPARE A PHARMACEUTICAL PRODUCT FOR RELEASE IN COLLABORATION WITH THE PHARMACIST**

Pharmacy technicians, as part of the pharmacy team, use their knowledge and skills and follow applicable policies & procedures to:

### **D1.0** COMPETENCY UNIT

Confirm that the pharmacist has had the opportunity to review the prescription and the patient profile or health record prior to the release of the pharmaceutical product.

### **D2.0** COMPETENCY UNIT

Prepare/compound a pharmaceutical product for release in collaboration with the pharmacist.

#### COMPETENCY ELEMENTS

**D2.1** Obtain a pharmaceutical product that meets the requirements for the prescription

- i) Confirm availability of the product
- ii) Locate alternate sources when required

**D2.2** Prepare/compound a sterile pharmaceutical product

- i) Follow approved formulation instructions
- ii) Select the needed product(s) and check the expiry date(s)
- iii) Calculate, convert, and document the results of dosage calculations and extemporaneous weights and volumes
- iv) Verify calculations with a second member of the pharmacy team who is registered
- v) Verify accuracy and appropriateness of ingredients and quantities

including weights and volumes; and document

vi) Select equipment

vii) Follow aseptic technique

**D2.3** Prepare a non-sterile compound, a pre-packaged pharmaceutical product, or a reconstituted pharmaceutical product

i) Follow approved formulation instructions

ii) Select the needed product(s) and check the expiry date(s)

iii) Verify dosage calculations, weights and volumes, and, where necessary, confirm these with a second member of the pharmacy team who is registered and document the results.

iv) Count, measure, or weigh the pharmaceutical product or products

v) Follow clean technique

**D2.4** Label the pharmaceutical product

i) Select the appropriate container for the pharmaceutical product

ii) Affix the appropriate label(s) to the pharmaceutical product or container

iii) Provide appropriate patient information materials when specified by the pharmacist

### **D3.0** COMPETENCY UNIT

Verify the accuracy and completeness of a pharmaceutical product prepared for release.

#### COMPETENCY ELEMENTS

**D3.1** Check the accuracy and completeness of the pharmaceutical product.

i) Ensure that the demographic and prescription data are correct and complete

ii) Confirm that the:

- Correct pharmaceutical product is being dispensed
- Pharmaceutical product is correctly labeled, including appropriate auxiliary labels
- Appropriate patient information materials have been provided

iii) Confirm that the pharmaceutical product has been checked and signed off by a registered pharmacist, pharmacy intern, registered pharmacy technician \*

\* Explanation

To support public safety:

(a) The registered pharmacy technician shall be permitted to check pharmaceutical products prepared by another registered pharmacy technician or by unregistered pharmacy personnel

(b) The registered pharmacy technician, having prepared a pharmaceutical product, shall have it checked by a registered pharmacist, pharmacy intern or another registered pharmacy technician

**D3.2** Complete required records and documentation.

### **D4.0** COMPETENCY UNIT

Collaborate with the pharmacist in the release of the pharmaceutical product to the correct patient or patient's agent.

#### COMPETENCY ELEMENTS

**D4.1** Confirm that the patient or the patient's agent has received or has been offered counseling by the pharmacist

#### **E: COMPETENCY: PERFORM DISTRIBUTIVE AND QUALITY ASSURANCE FUNCTIONS TO ENSURE THE PATIENT RECEIVES QUALITY PHARMACEUTICAL PRODUCTS**

Pharmacy technicians, as part of the pharmacy team, use their knowledge and skills and follow applicable policies and procedures to:

#### **E1. 0 COMPETENCY UNIT**

Participate in distributive and quality assurance functions.

#### COMPETENCY ELEMENTS

**E1.1** Contribute to optimal patient care and pharmacy services

- i) Use critical-thinking, problem-solving, and decision-making skills to support effective and efficient patient care and pharmacy services
- ii) Develop effective working relationships with members of the pharmacy team
- iii) Provide constructive feedback on opportunities that could lead to increased effectiveness and efficiency of pharmacy services
- iv) Work with pharmacy management to identify staffing requirements, schedule personnel, determine and coordinate tasks, prioritize and organize pharmacy services, and develop operational policies
- v) Work together with members of the team to determine workflow, monitor progress of workflow, and identify and resolve barriers and challenges to optimal workflow
- vi) Use time management skills to prioritize workload demands, establish and work within realistic time frames, and evaluate and modify work patterns
- vii) Select technology that is appropriate to the task and use correctly
- viii) Follow guidelines for safe and correct use of automated medication storage distribution devices
- ix) Comply with health and safety legislation and workplace policies and procedures
- x) Address patient and colleague safety by ensuring a clean and accessible work area following infection control procedures, exercising caution related to workplace hazards, and making certain that high-risk activities are performed safely

**E1.2** Apply knowledge of inventory management to contribute to optimal patient care and pharmacy services

**E1.3** Follow procedures for the proper storage, handling, preparation, distribution, removal, and disposal of drugs

**E1.4** Participate in error reduction and prevention processes

- i) Carry out distributive functions in a manner that minimizes medication errors and discrepancies
- ii) Collaborate with other healthcare professionals in reducing and preventing medication errors and discrepancies

**E1.5** Perform appropriate audits on automated dispensing cabinet replenishment, packaging/repackaging of pharmaceutical products, bulk compounding products, and medication storage areas outside the dispensary

i) Confirm that the:

- Correct pharmaceutical product is being dispensed
- Dosage and quantity of the pharmaceutical product being dispensed is correct
- Pharmaceutical product is correctly labeled

ii) Confirm that the appropriate signatures have been affixed and that documentation has been completed

**E1.6** Participate in the development, implementation, and evaluation of quality indicators

## **F: COMPETENCY: COMMUNICATE WITH PATIENTS, PATIENTS' AGENTS, PHARMACISTS, AND HEALTHCARE PROVIDERS**

Pharmacy technicians, as part of the pharmacy team, use their knowledge and skills and follow applicable policies & procedures to:

### **F1. 0 COMPETENCY UNIT**

Communicate within the role to support optimal patient care and pharmacy services.

### **COMPETENCY ELEMENTS**

**F1.1** Refer all therapeutic issues and questions to the pharmacist

**F1.2** Establish and maintain positive working relationships with the patient, the patient's agent, members of the pharmacy team, and healthcare providers

i) Display:

- Respect, attentiveness, openness, empathy, and caring
- Sensitivity to nonverbal communication
- Sensitivity to diversity

ii) Demonstrate appropriate and effective communication skills by:

- Recognizing facilitators of, and challenges, to communication
- Using oral and written language and communication style appropriate to purpose, setting, and situation
- Using active listening, verbal and nonverbal communication skills including interviewing skills, and whenever appropriate, conflict

resolution skills

**F1.3** Maintain confidentiality of patient information

F1.4 Document demographic and prescription data, and other pharmacy related information in the patient profile or health record

- i) Follow standards, policies, and procedures related to documentation and to the maintenance, security, and disposal of records
- ii) Document clearly, concisely, correctly, and in a timely manner

**F1.5** Use established communication policies, procedures, or protocols within the pharmacy, and when interacting with the patient, the patient's agent, and healthcare providers

## 6.2a Program/Unit Conclusions

Location	Program/Unit Conclusions
Santa Rosa	<p>Allocation of space for Pharmacy Technician Training Center classroom adjacent to Emeritus 1575 to be secured.</p> <p>Pharmacy Technology Smart Classroom will serve as additional large capacity classroom for other classes, after designated programs courses right of first assignment have been scheduled.</p> <p>This Training Center will also serve as an emergency dispensary; aligning the RACE Catastrophic Plan</p>
Santa Rosa	<p>Pharmacy 100 to be offered Fall 2014 and instructed by pharmacist or pharmacy technician as contextual learning and eliminate barrier to serving student needs.</p> <p>Supports College Strategic Plan in student centered instruction, work-based learning, response to labor employer and advisory committee demand, alignment with compliance, accountability for CTE training and student retention and success.</p> <p>In the Pharmacy Technician Program Annum student scheduling planning template Friday and Saturdays from 8 am to 10 am. One section may be 100% online or hybrid in alignment with the College Strategic Plan.</p>
Santa Rosa	<p>Strategic Plan:            \$500,000 for Naming the total building space of the Pharmacy Technology SkillsII Lab.            \$100, 000 for Naming the Retail Training Facility: Submission for invitation; Feb 2014 completed.            \$100,000 for Naming the Inpatient Training Facility            \$100,000 for Naming the Compounding Training Facility            \$100,000 for the Gift of Gratitude Pharmacy History            Corporate and Individual Endowments</p>
Santa Rosa	<p>The three major Pharmacy Corporates have expressed a strong desire for Naming rights to the Lab Space.</p>
ALL	<p>Collaborative relationships exist with Kaiser Santa Rosa, Santa Rosa Memorial Hospital, Sutter Santa Rosa, Marin General Hospital, Sonoma Valley Hospital and Palm Drive Hospital, Ukiah Valley Medical Center, and Infusource.</p> <p>Since inception, the proactive student placement rate for gainful employment by hospitals and home infusion companies for either full time, part time, on-call or as relief technicians iss above average.</p> <p>The program Director created, implemented and operates a robust job opportunity digital notification system via listserv.</p> <p>SRJC Pharmacy Technician Graduates are currently employed at Healdsburg General Hospital, Queen of the Valley Hospital, Sonoma Valley Hospital, Kaiser Santa Rosa, Kaiser San Rafael, Kaiser Vallejo, Cancer Centers of America, Memorial Hospital, Sutter Hospital Santa Rosa, Sutter Hospital Sacramento, Sutter Hospital Lakeport Hospital and Infusource Infusion Center and continue to integrated in to innovative employment markets.</p> <p>Consistent feedback communicates to us that SRJC students are a welcome part of the integrated health care team within the hospitals. Directors of Pharmacy and colleagues indicate the students are well trained in aseptic technique and hospital work flow. They contribute equally to the quality of patient service.</p>
Santa Rosa	<p>Allocation of space for Pharmacy Technician Training Center classroom adjacent to Emeritus 1575 to be secured.</p> <p>Pharmacy Technology Smart Classroom will serve as additional large capacity classroom for other classes, after designated programs courses right of first assignment have been scheduled.</p> <p>This Training Center will also serve as an emergency dispensary; aligning the RACE Catastrophic Plan</p>
ALL	<p>Pharmacy 151 continue to Team teach with two top graded instructors. Continue one section on the Santa Rosa Campus and expand one section to the Petaluma campus.</p> <p>Additionaly section of Pharm 152 on the Petaluma campus. Captures increased student demographics. Courses offered Tuesday evenings. This compliments the balance of the courses on Saturdays.</p> <p>Employer and educational data support this team taught course and work-based learning model.</p>

## 6.2b PRPP Editor Feedback - Optional

The Pharmacy Technician program is a popular and growing program with a good employment rate for graduates. The program is offered on Friday and Saturdays with some online components and courses. This allows flexibility for the working adult.

The space in Emeritus currently used only on Fridays and Saturdays by the pharmacy program needs to be evaluated to share as a skills laboratory with other health science programs. Improvements to the space need to be made as part of the strategic plan for additional skills laboratory space for health

science programs and large lecture, smart classroom. Additionally, the Anthropology Lab (directly adjacent ) and the Race Dental Lab have 'dead use' times.

Other areas for growth with this program would include offering Pharm 158 Chemo Training Hybrid, Pharmacy 151 and 152 at the Petaluma campus and/or sharing space with chemistry laboratories in the new science building upgrade depending on funding from potential bond. Longs Drugs Foundation donated \$50,000 in 1999 to the SRJC Foundation for the building of a Pharmacy Technology classroom which is yet to be built. Referenced SRJC Foundataion and Press Democrat 1999 article.
